

Features that boost

Efficiency and Productivity

We bring data to life. And that's when the magic happens. Access real-time insights that speed up your business. Stay on top of those 'hot & sensitive' deliveries. It's time to switch gears & accelerate business operations with Uffizio's fleet management platform!

Shorter Routes. More deliveries.

Route Optimization

Our software uses complex algorithms to analyze optimized routes, so you can streamline driver dispatching, on-demand consumer requests, and bottom-line productivity:

Experience savings on fuel costs

Minimizing maintenance costs

Reducing repetitive administrative tasks

Keeping up with time-sensitive deliveries

Simplifying administrative tasks

Job Module

Perfect for creating & monitoring tasks, the job module has become an essential part of FMCG, trucking, delivery management, and waste collection businesses. Here's why:

You can configure delivery start and endpoints

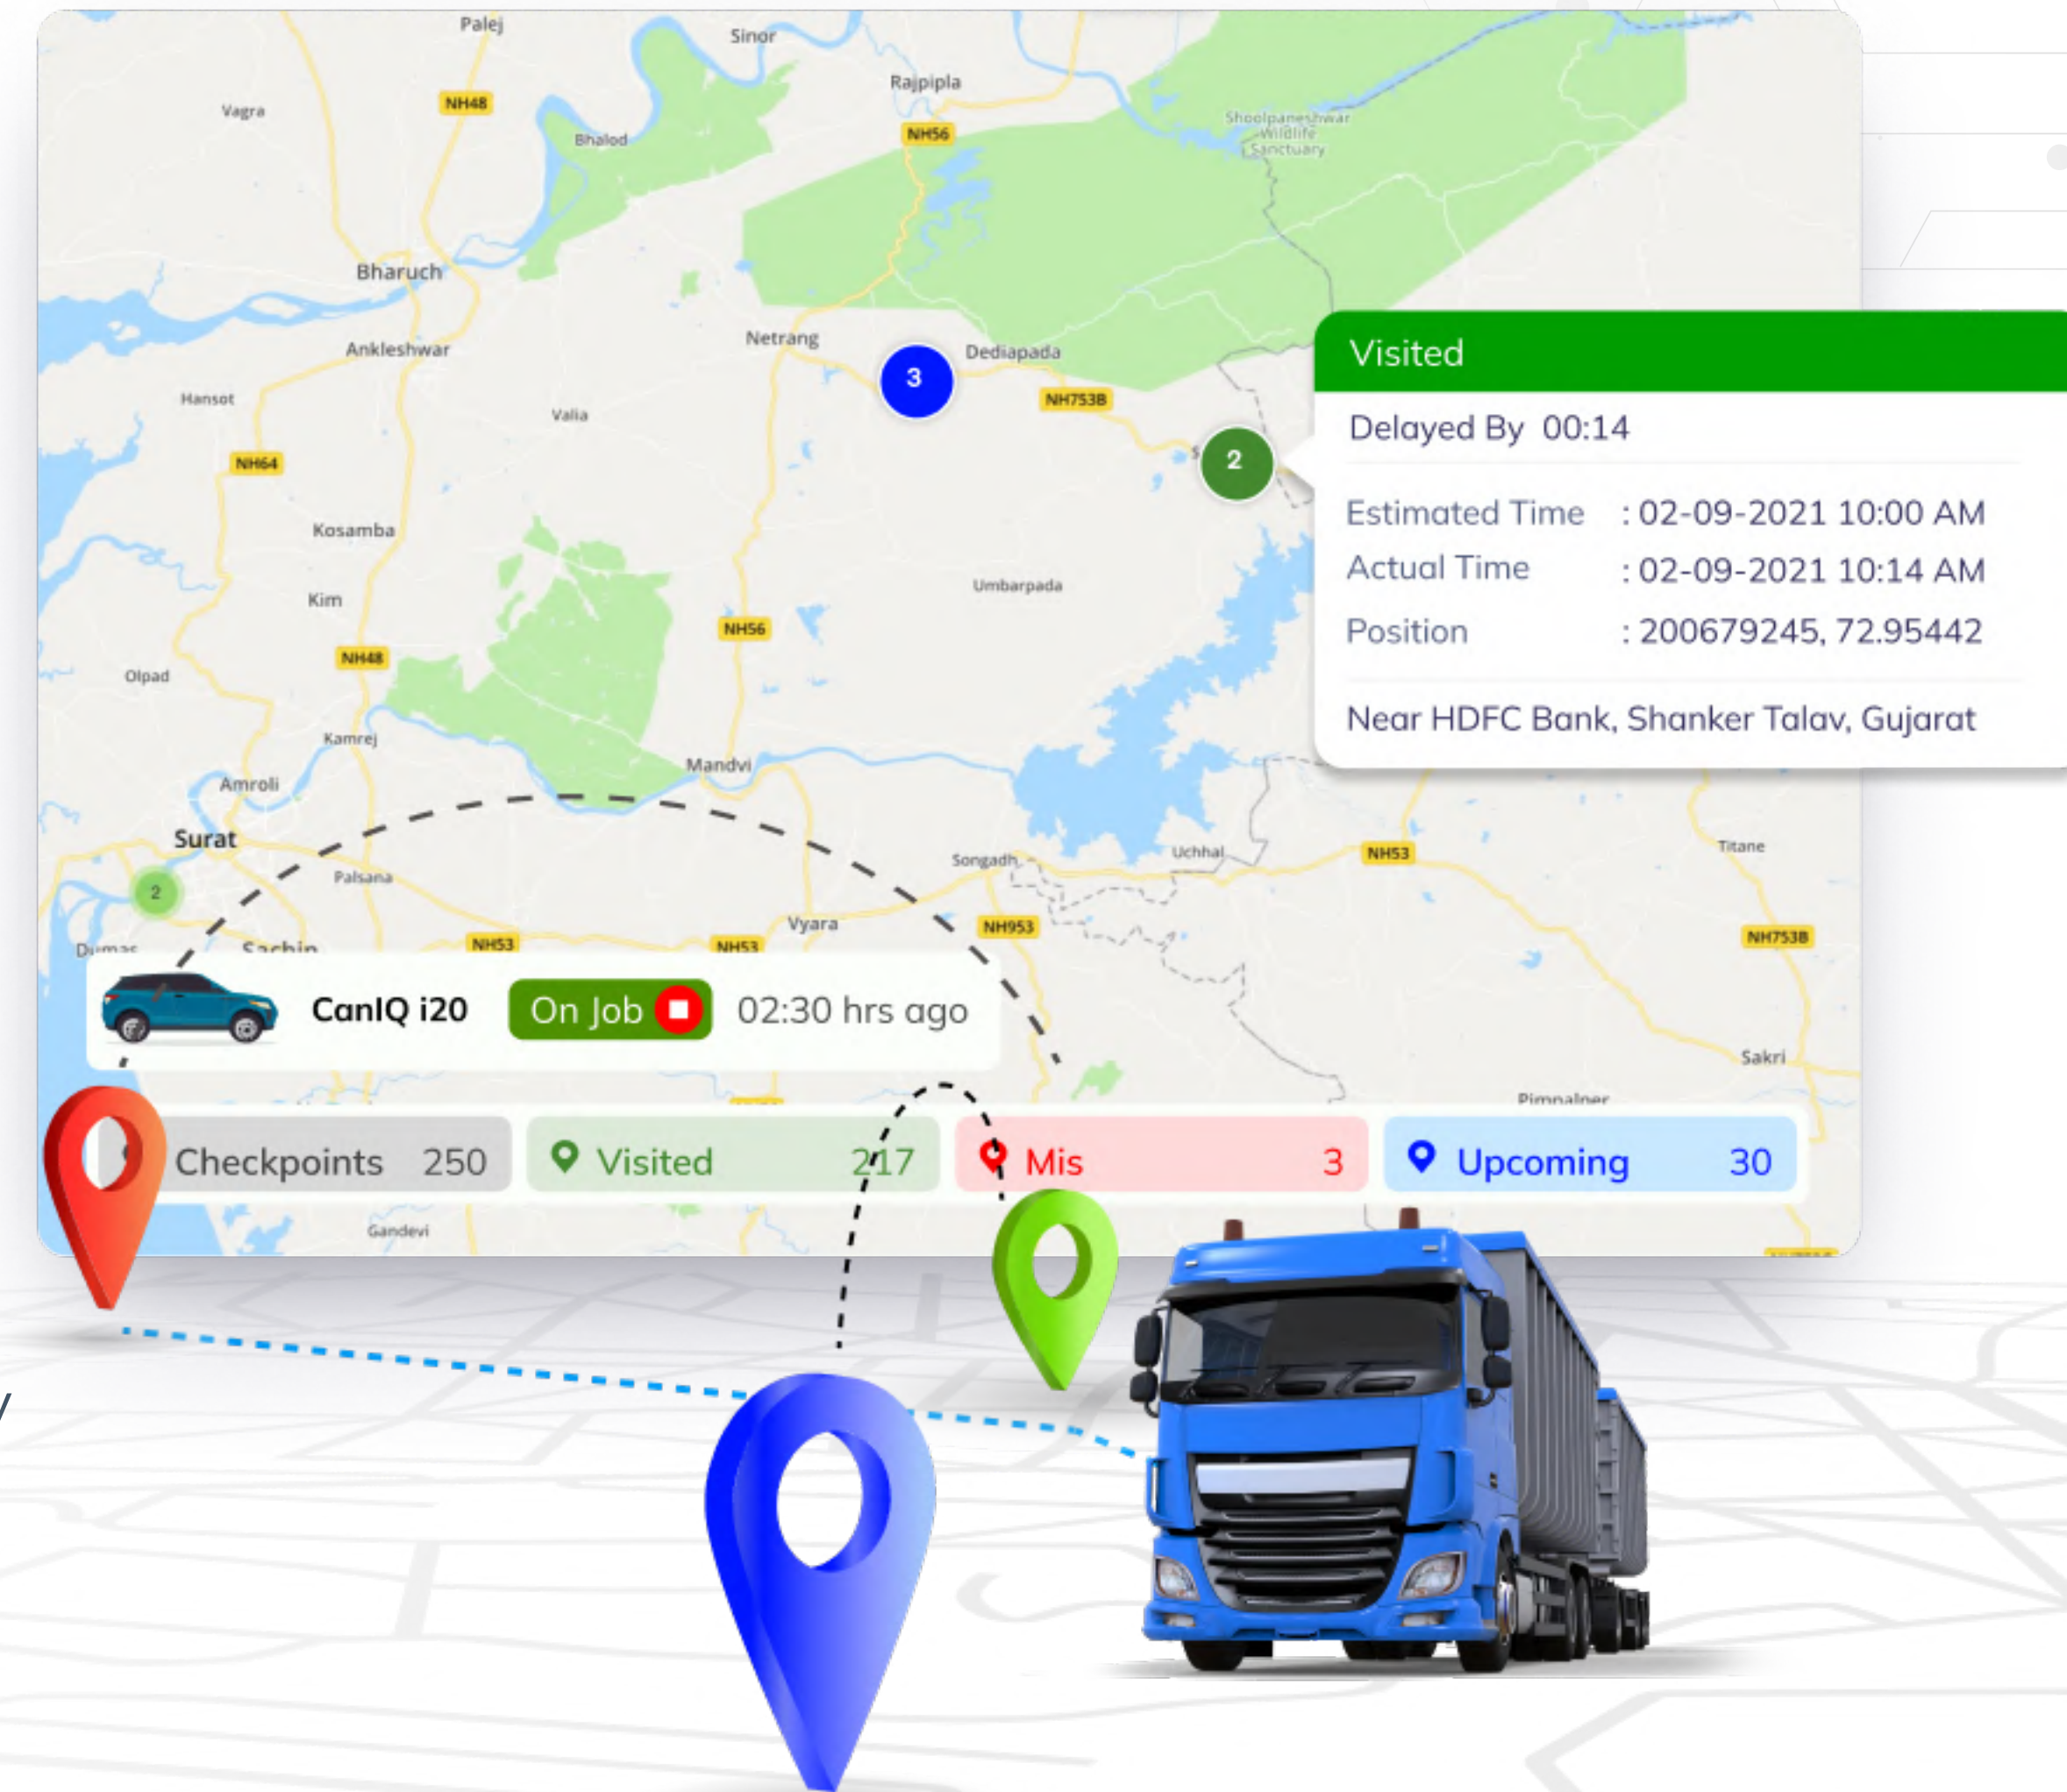

Get notified of failed or successfully completed tasks

Customize buffer or halt times in between delivery jobs

Know how much money you make for every successful delivery

Get quicker access to data that matters

Dashboard

Dashboards give you a 360° view of your account. It has one-click access to all metrics that you need to make your business more productive:

Check up on the number of active or idle vehicles

Pick and choose the widgets you'd like to hone in on

View alerts and maintenance reminders on the dashboard

Get insights into profitable as well as money-costing trends

Say no to broken-down vehicles

Maintenance

Know when your fleet or equipment is ready for servicing or repair without constantly tracking their work hours.

- 01 | Get maintenance reminders via SMS, email, and push notifications
- 02 | System auto-resets schedules based on the date of acknowledgment
- 03 | Know which vehicle or equipment is ready for servicing or repair
- 04 | You'll significantly boost vehicle performance, uptime, and efficiency

Charts & reports help in understanding fleet utilization trends

Analytics

Get visual insights into your fleet’s usage, operational costs, driving patterns, business tasks, and more.

Our platform’s analytical suite includes summaries, reports, and charts

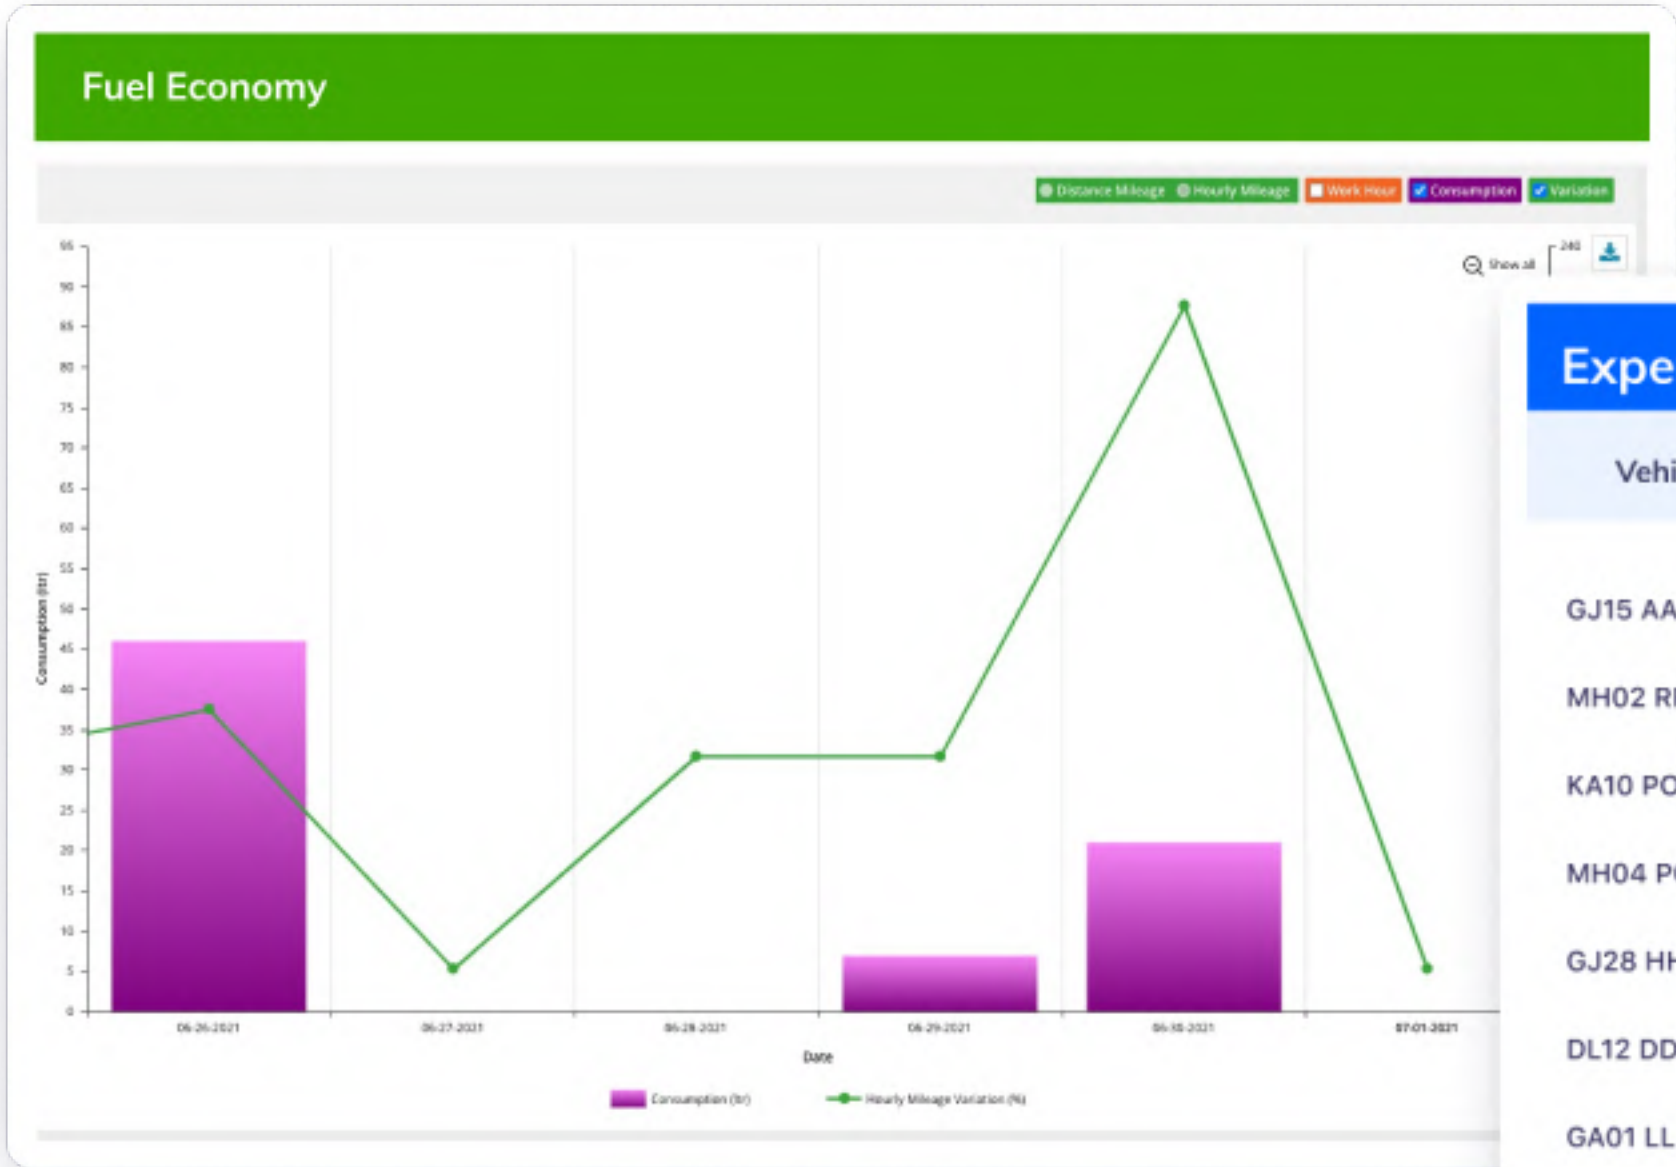

See which vehicles have higher cost-per-mile than the rest

Eliminate all money-draining habits for higher profits

Analyze driver performance by reviewing ratings and driving violations

Here to bring your fuel costs down

Fuel Management System

Fleet managers of the world are quickly integrating fuel management systems to their fleet management platform, and so should you. Here's why:

Tracking fuel can reduce up to 30% of your total fuel costs

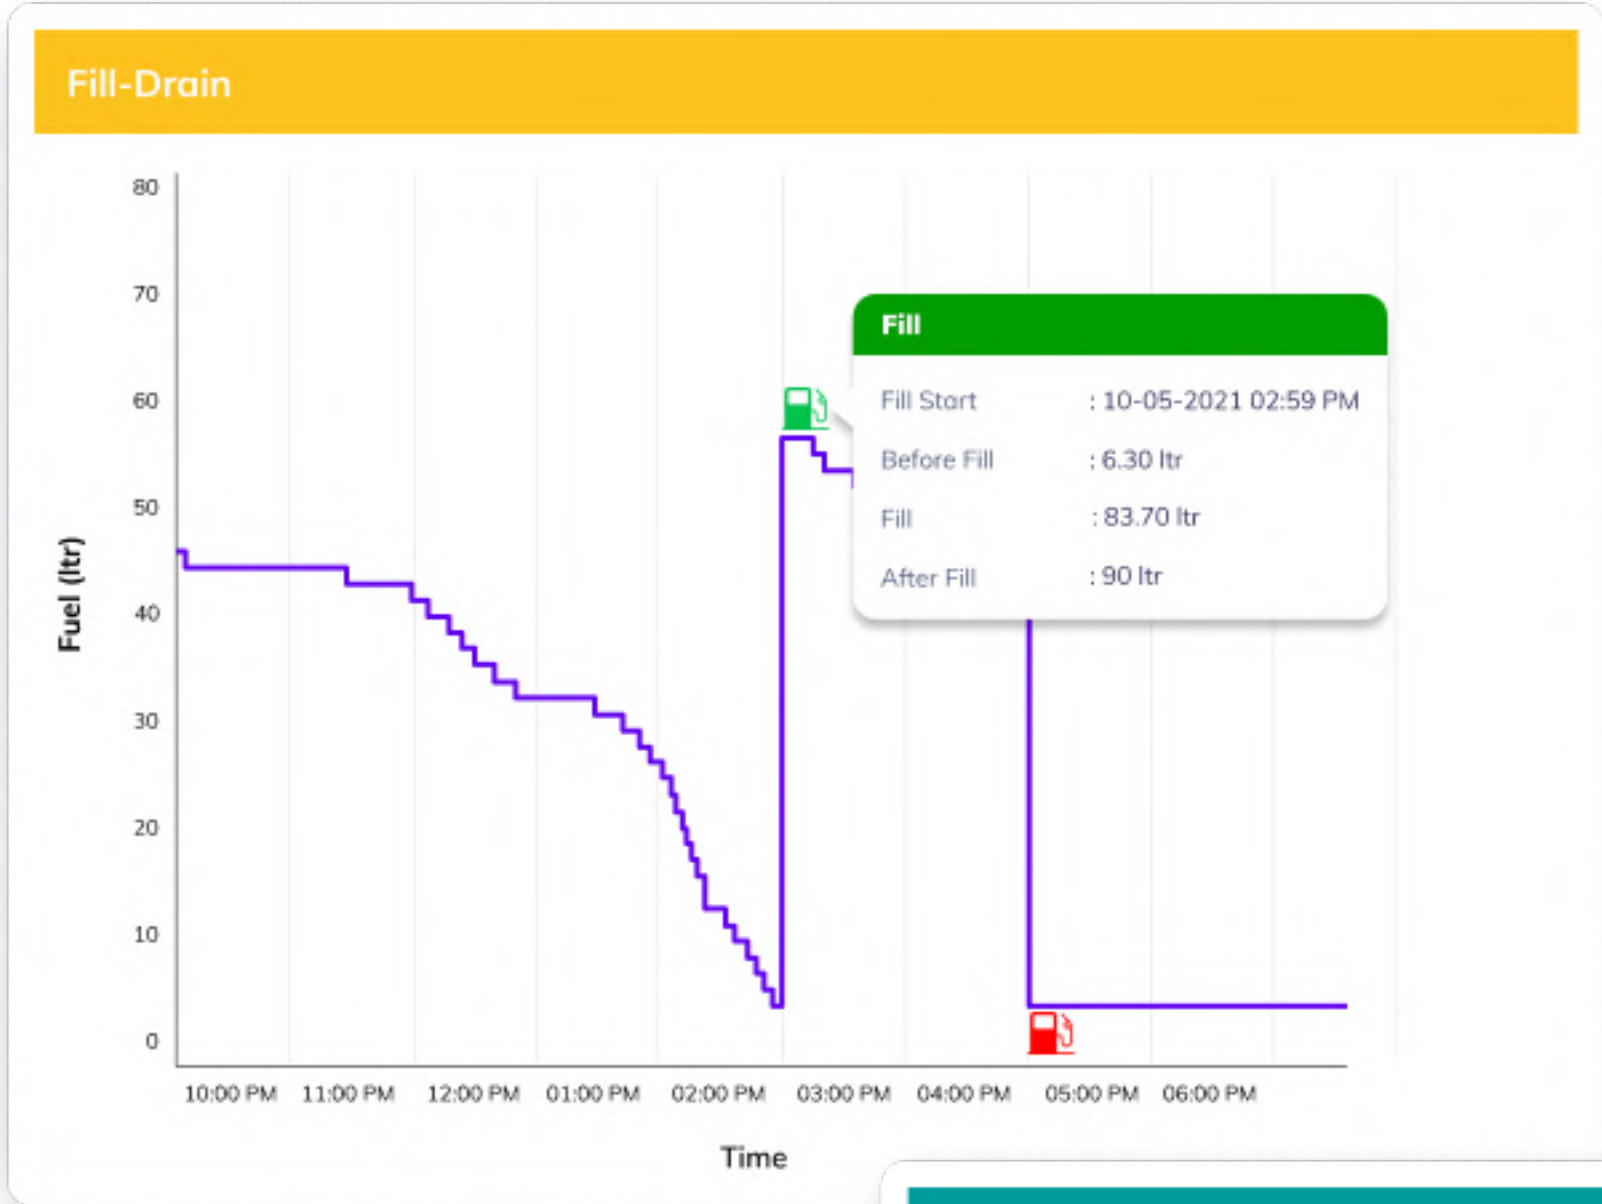

With a fuel management system, you'll eliminate 90% of all fuel thefts

You'll see improved vehicle mileages and drive more miles per gallon

With Uffizio's open telematics software, you'll face zero sensor compatibility issues

Healthy tires lead safer journeys!

Tire Management System

Improper tire pressures and temperatures can lead to skidding or adverse tire-related mishaps. Therefore, always make sure your tires are properly inflated before getting behind the wheel.

Increase overall safety

Reduced corrective maintenance

Build better fuel economy

Decrease fleets' braking distance

EcoDriving

A set of practices that strengthen fuel economy & improve vehicle efficiency. Since you cannot be with your drivers at all times, we've got tools—to make sure they drive well:

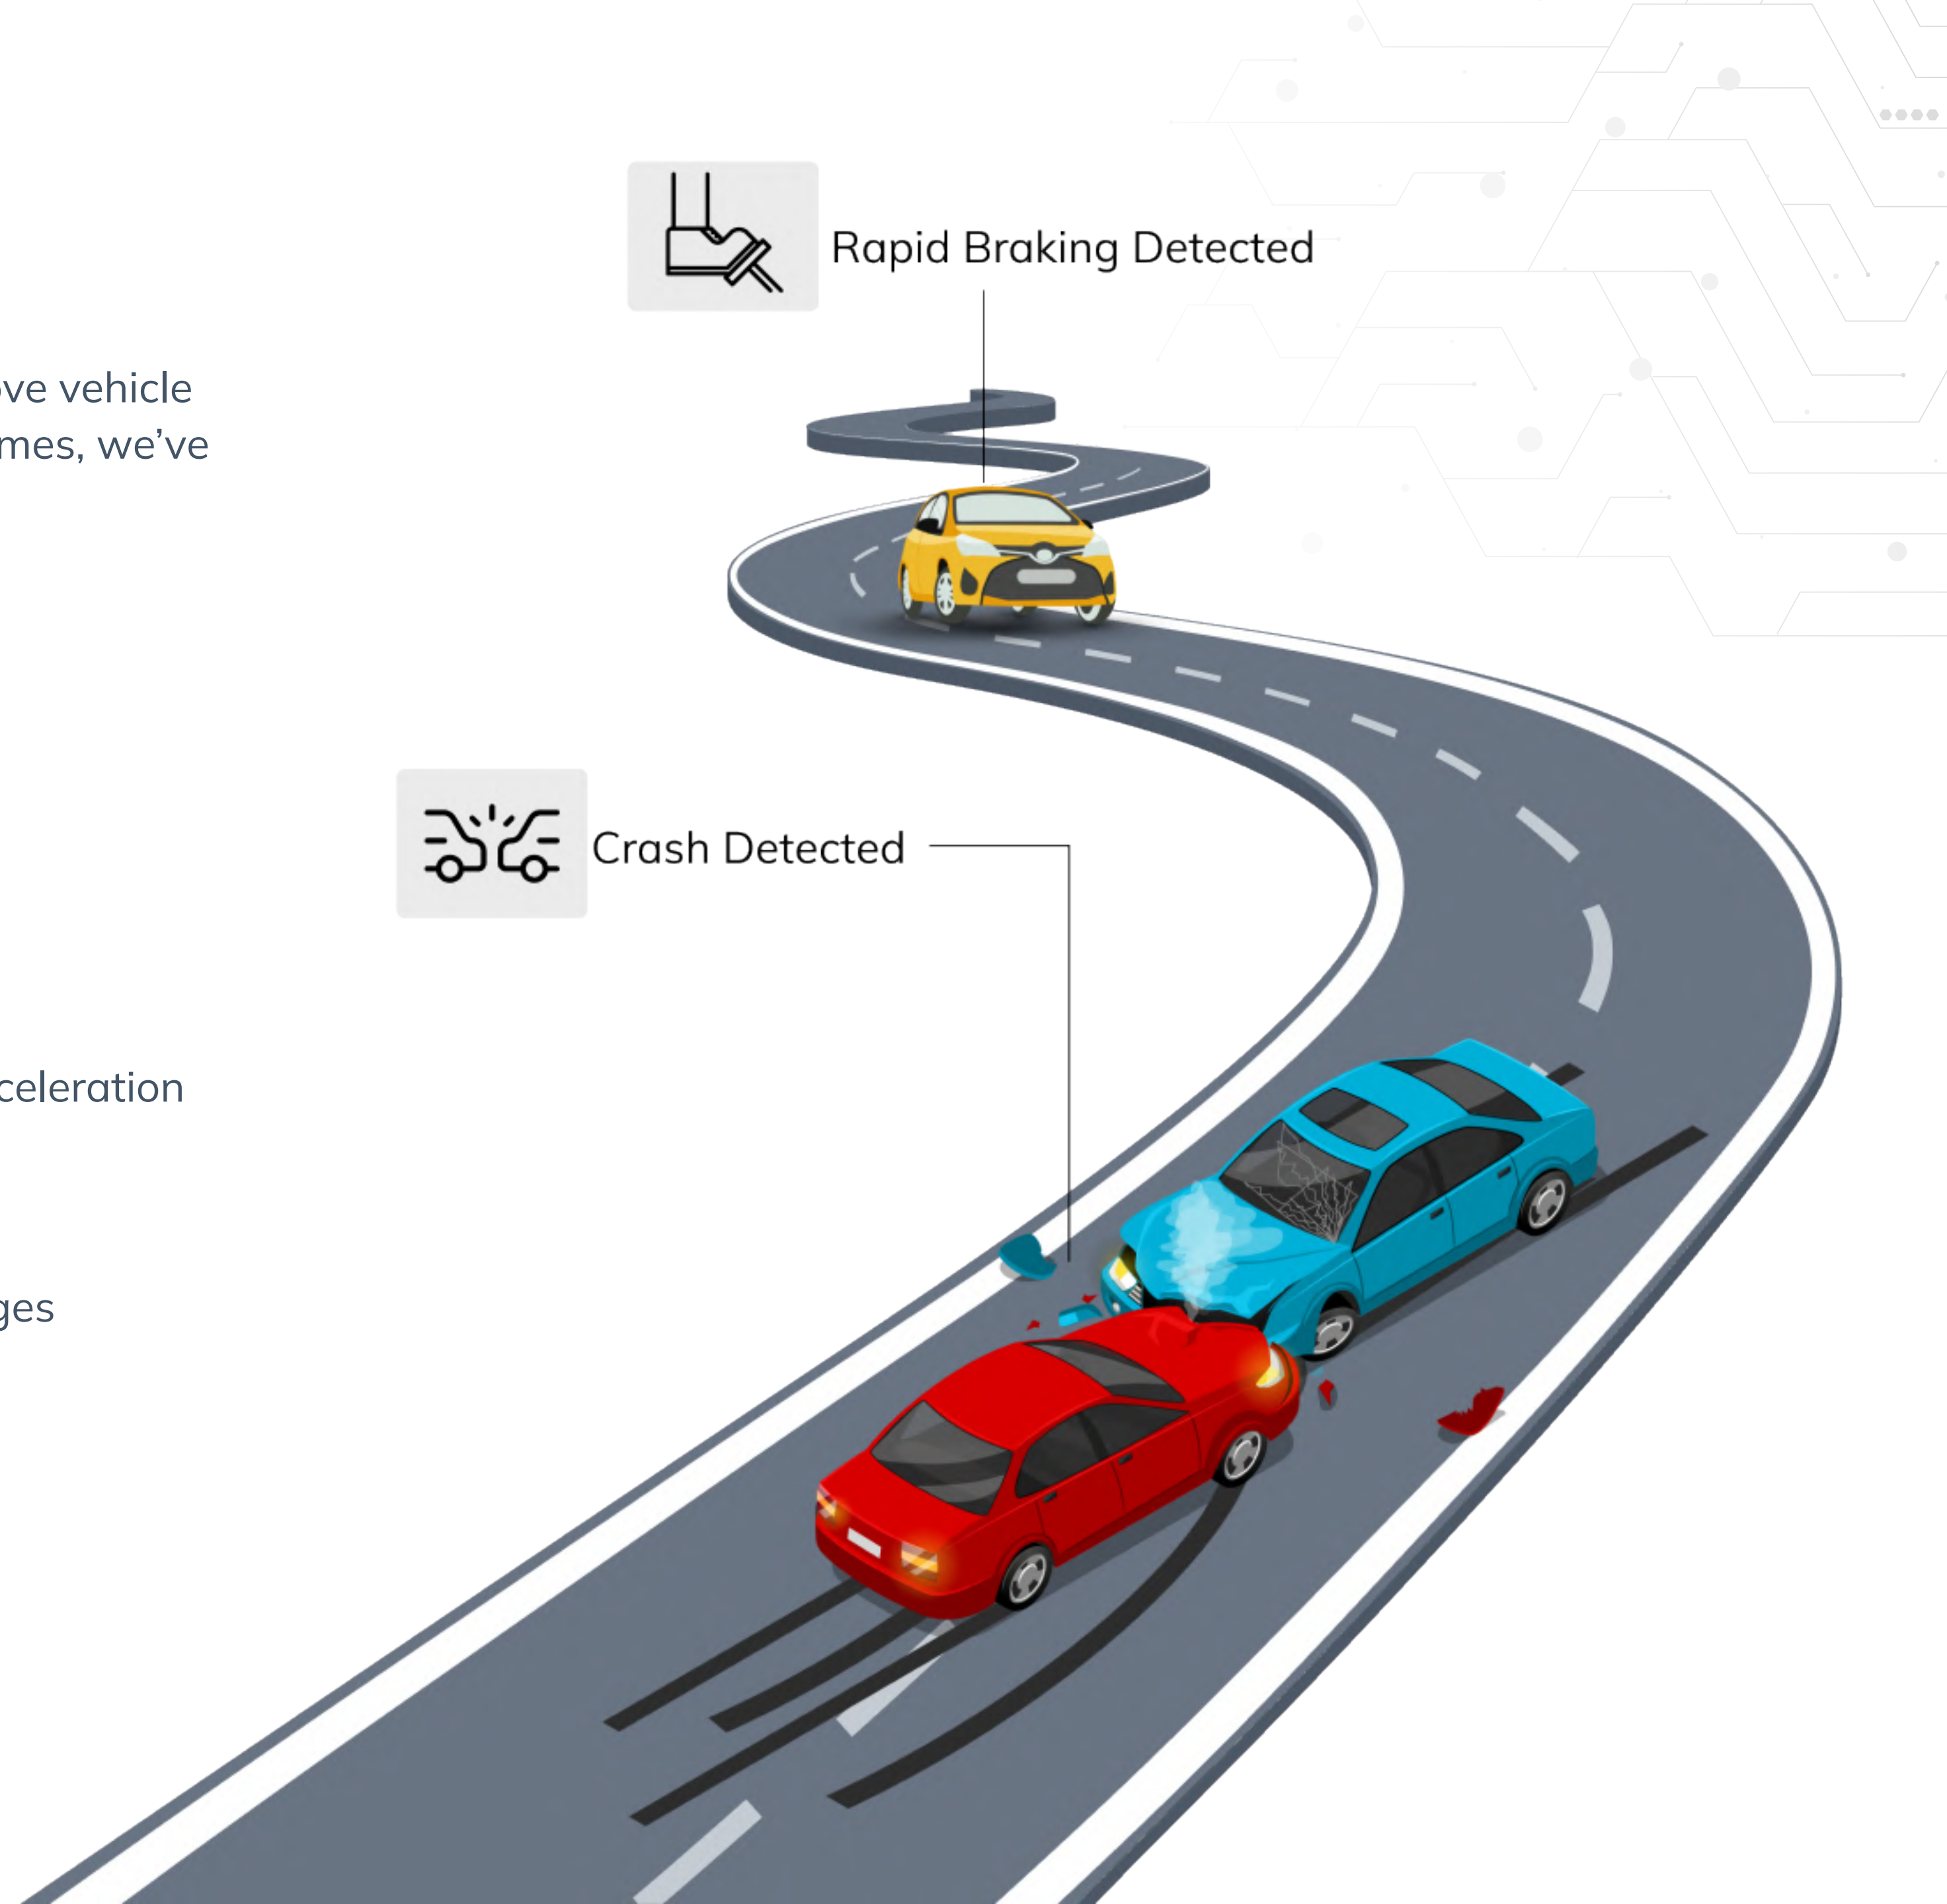

- 01 | Configure speed limits for your fleets
- 02 | Alerts for idling, excessive braking, and harsh acceleration
- 03 | Lower fuel costs by building better vehicle mileages
- 04 | Minimize the emission of greenhouse gases
