

LogyTrak helps you manage all aspects of your transportation business from one place. Optimize for efficiency with our integrated transport management platform that will automate the entire logistics process. Connect your supply chain, trade flows, and much more with a single platform.

Dashboard

A dashboard that is truly customizable

Utilise our intuitive, user-friendly dashboard to get quick access to all the logistics data you need. You get quick access to all the crucial data for your transportation business in a customised dashboard view. You can optimise on-time deliveries, track all of your cargo, and save operational costs with a dashboard made specifically for logistics service providers — all from one location.

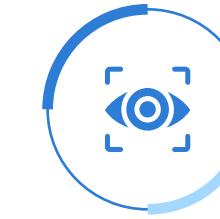

Check the status of all your cargo in visualised form

Track shipments and assign addresses easily

Check load status for all your shipments

Monitor and regulate tasks of all your drivers

Live Tracking

Track all your cargo globally in real-time

Keep an eye on what's going on everywhere, all the time. Our live GPS monitoring streamlines everything you need to know about your cargo to one place. Monitor every shipment and driver individually. Assign routes & addresses, create a geofence, and monitor assets — all from one place.

Accurate location of shipments on a real-time map

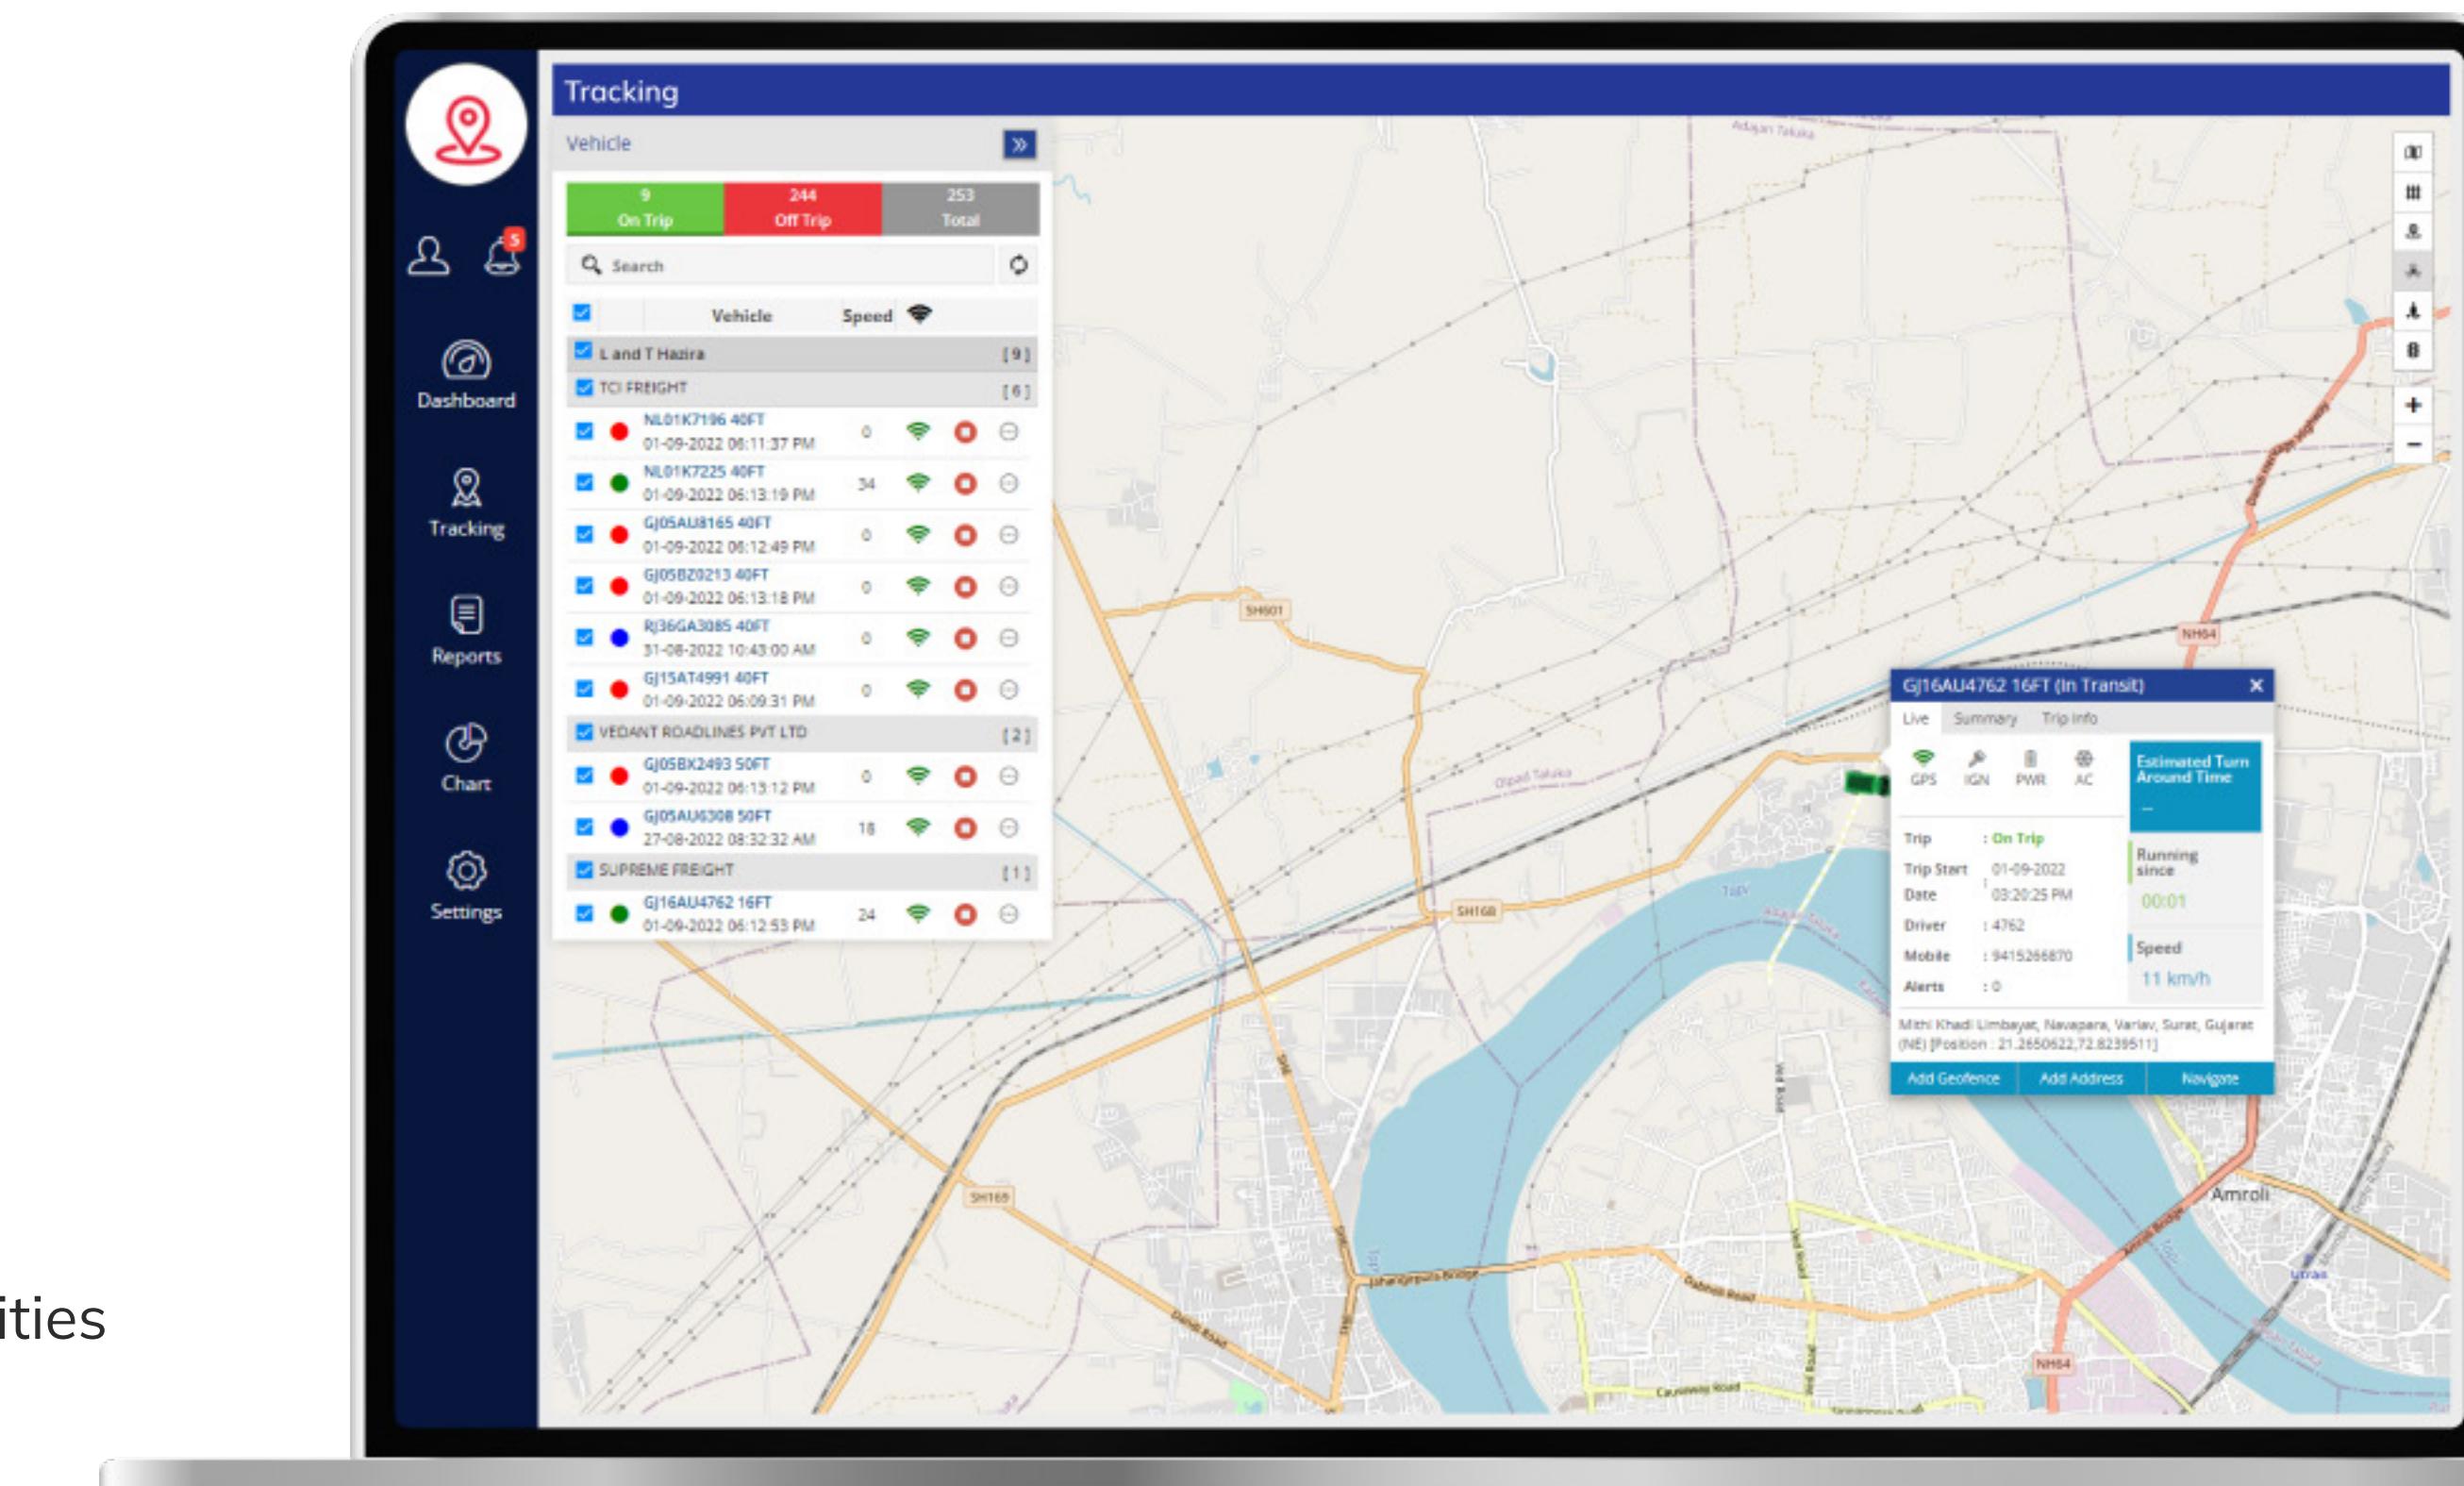

From engine health to fueling, track all vehicles in real-time

Get a list of vehicles that are running, idling, or inactive

Monitor driver behaviour, assign tasks and prevent irregularities

Fuel Management

Eliminate hidden fuel costs

Fuel is the most expensive part of your logistics operation. But are you aware of all the hidden fueling costs? From fuel theft and idling to rough routes and tire pressure, there are so many factors that affect fuel usage. And LogyTrak can help you eliminate all of them.

Easily detect fuel theft and other fueling irregularities

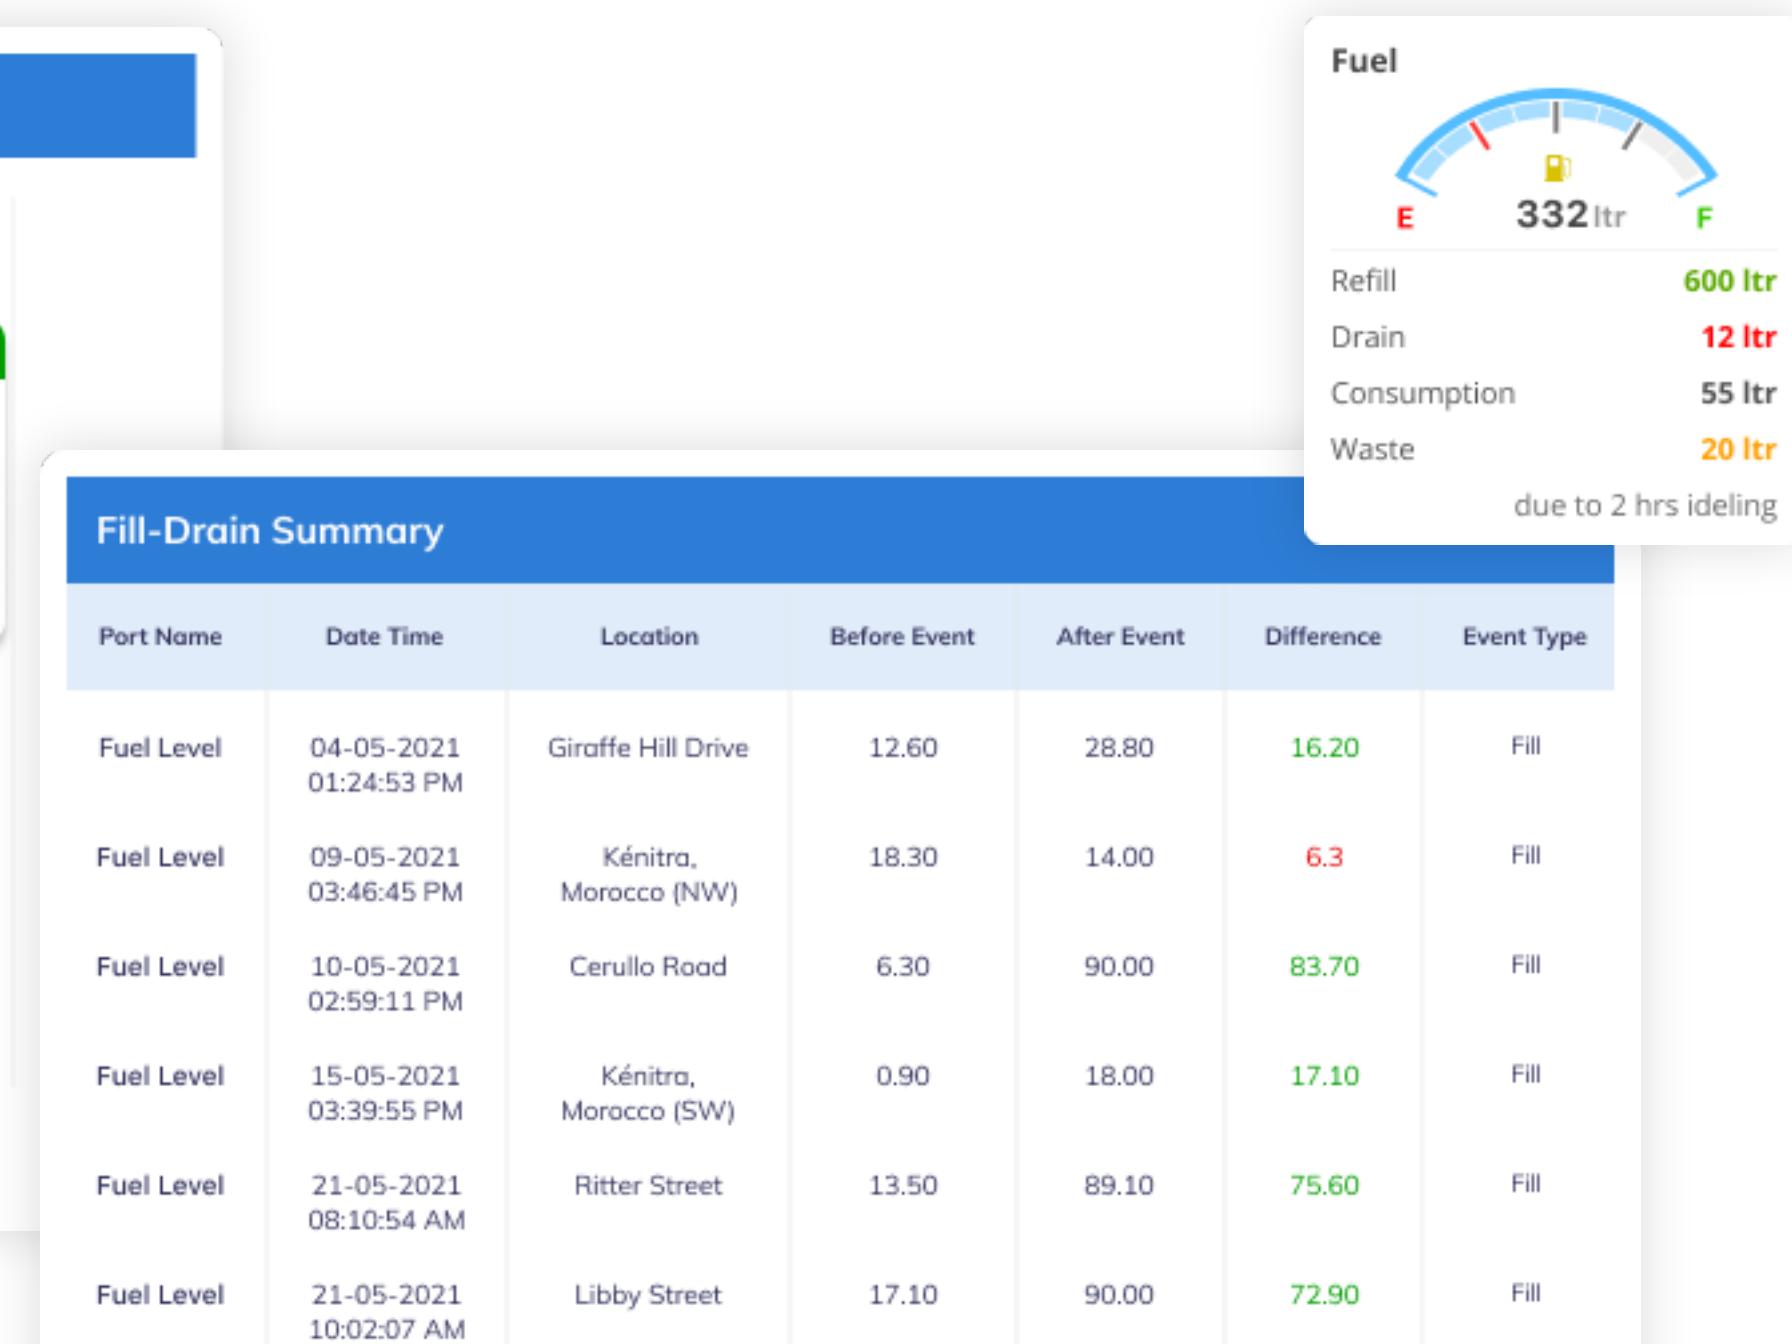

Track fuel refilling and fuel mileage for every shipment

Track and eliminate the factors affecting fuel economy

Fuel consumption and refilling reports for any date or time

Sensor data

Get Detailed Data Reports

Get detailed summaries from various sensors installed on your shipments. From reports on air conditioning to RFID data, get a complete picture of everything.

Air conditioning misuse reports

Geofencing

Create a virtual fence for your cargo

LogyTrak lets you create geographical zones with virtual borders. Create an area on the map with a defined radius. When your cargo or shipment passes this virtual barrier, you get alerted immediately.

Ensure timely deliveries by creating mandatory zones

Easily set mandatory zones or no-go zones

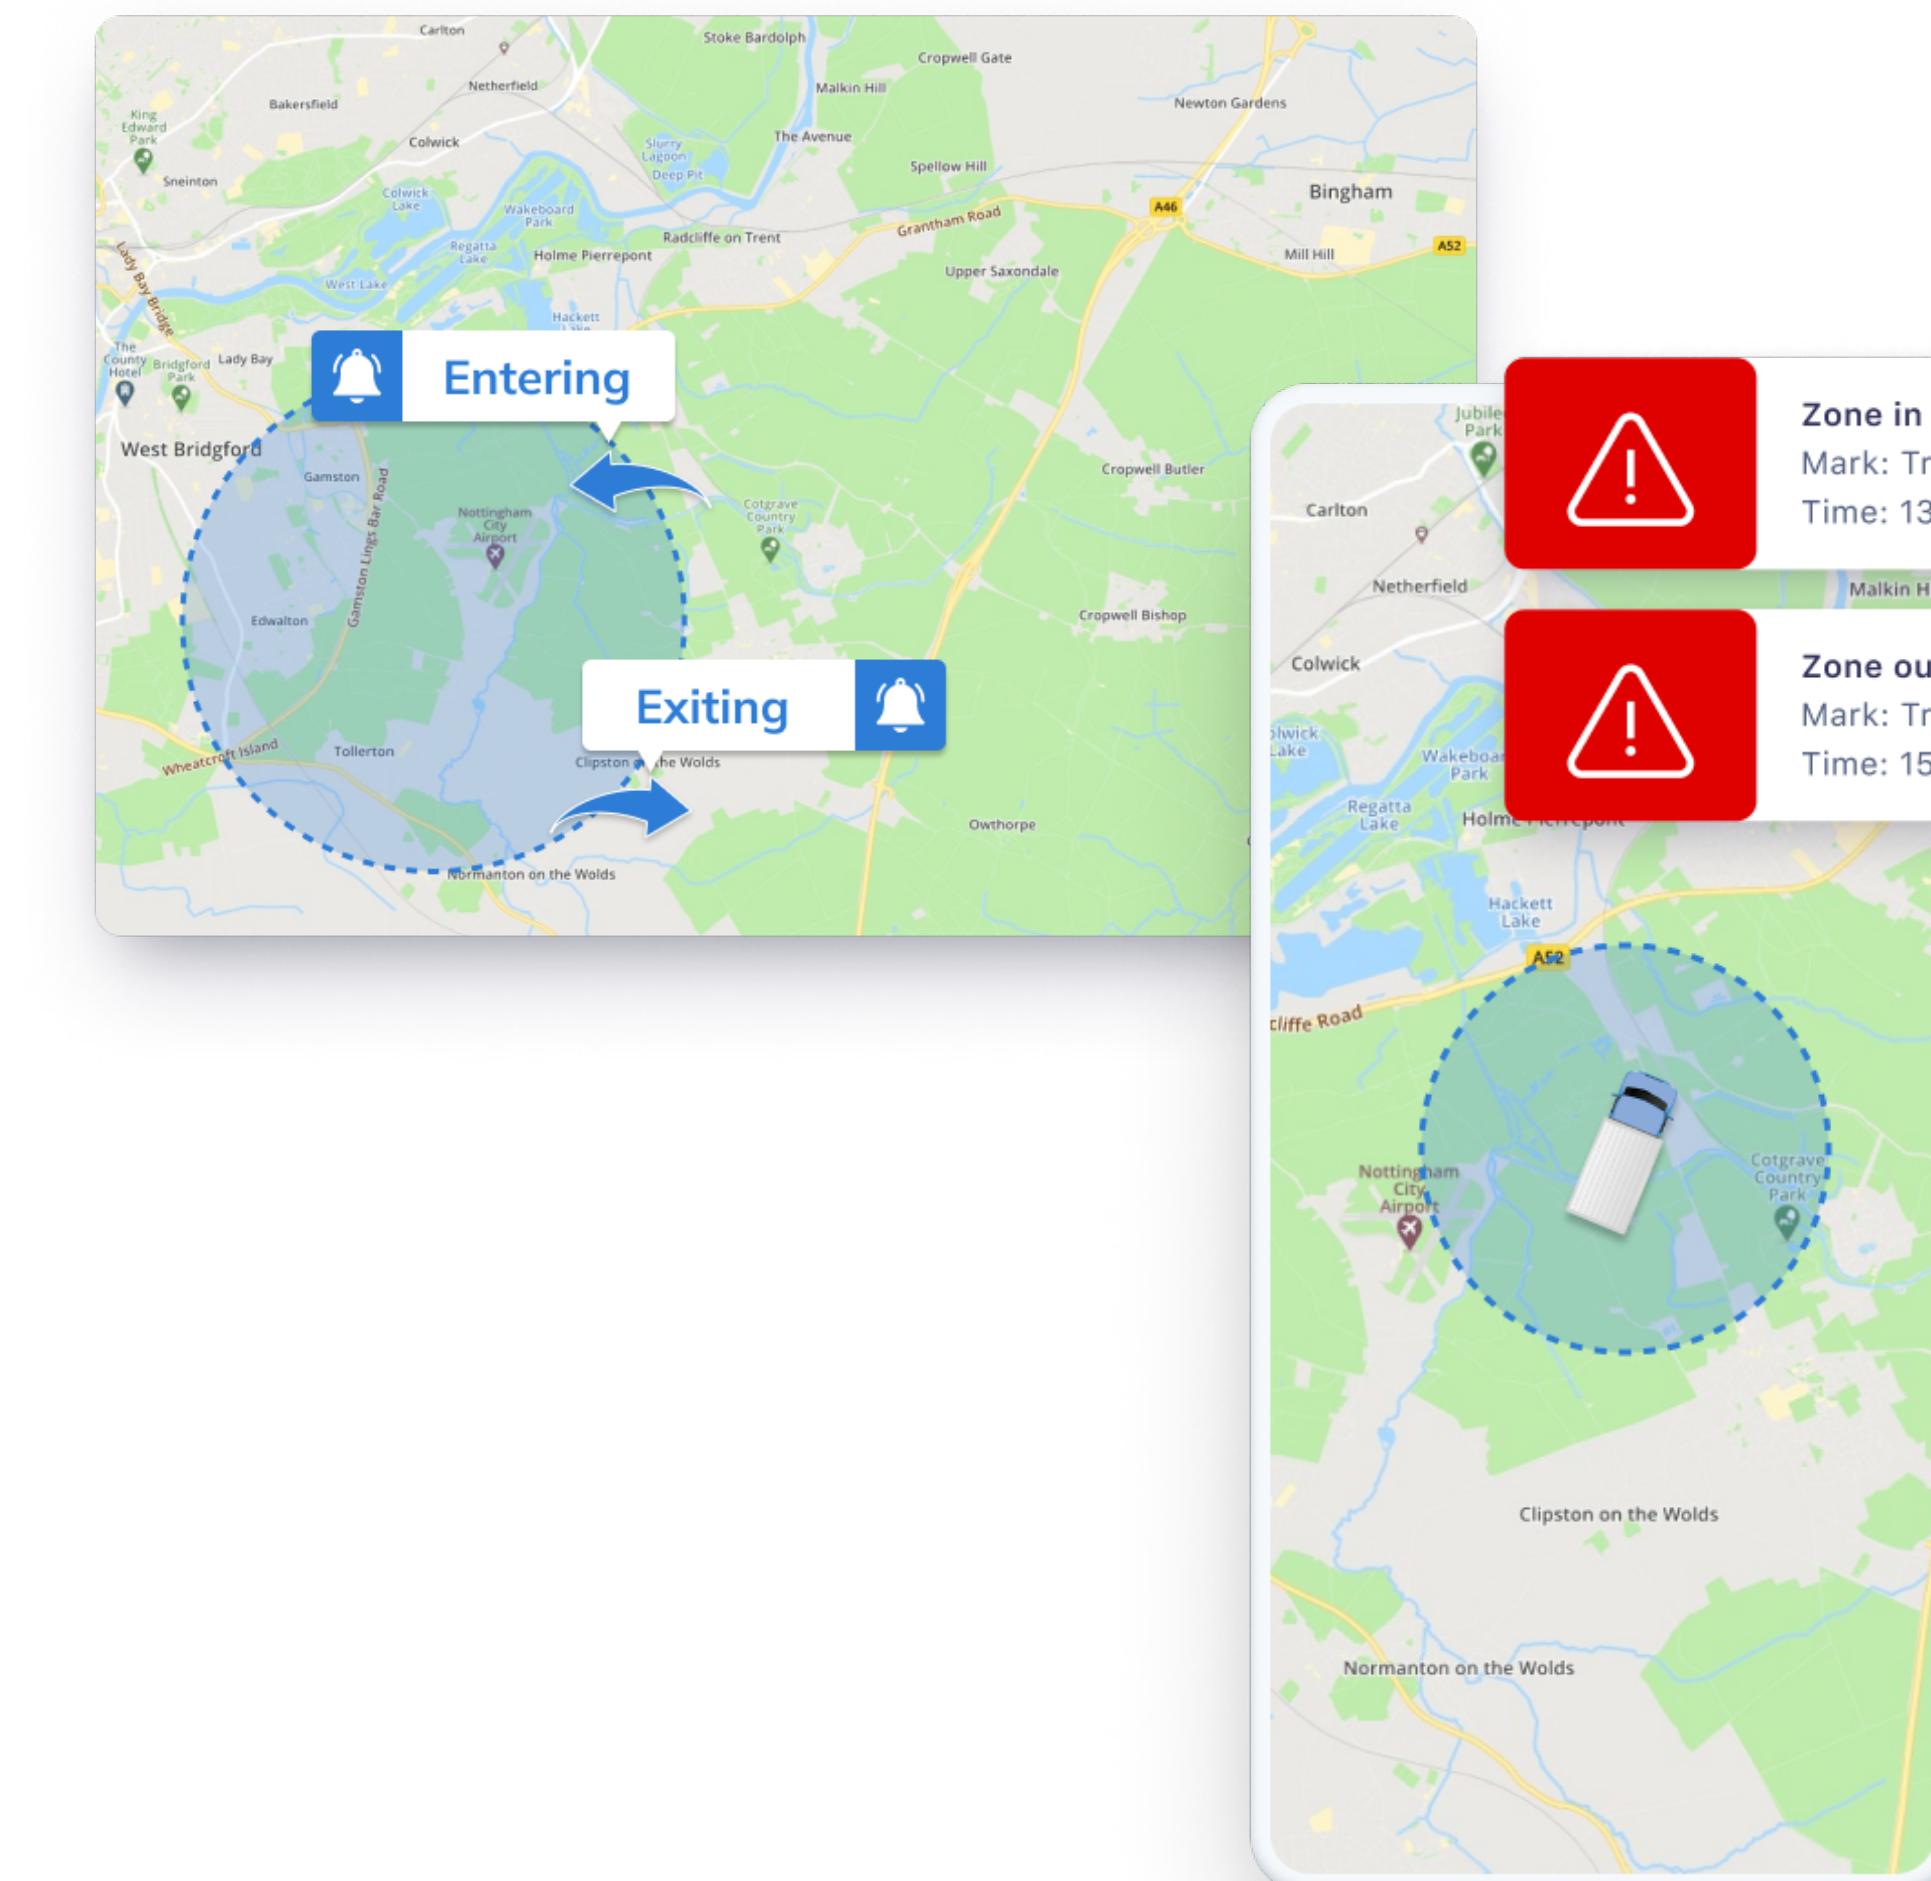

Immediate alerts if a boundary is breached

Prepare better for operations at docks or warehouses

Get real-time alerts about an incoming cargo or delivery

Alerts

Timely alerts for irregularity in shipments

In a transportation business, challenges are bound to arise. With timely alerts, be the first one to know if something goes wrong. From driving violations to irregular air conditioning, identify and rectify anything that is costing you money right away.

Get alerts for problematic driving behaviours

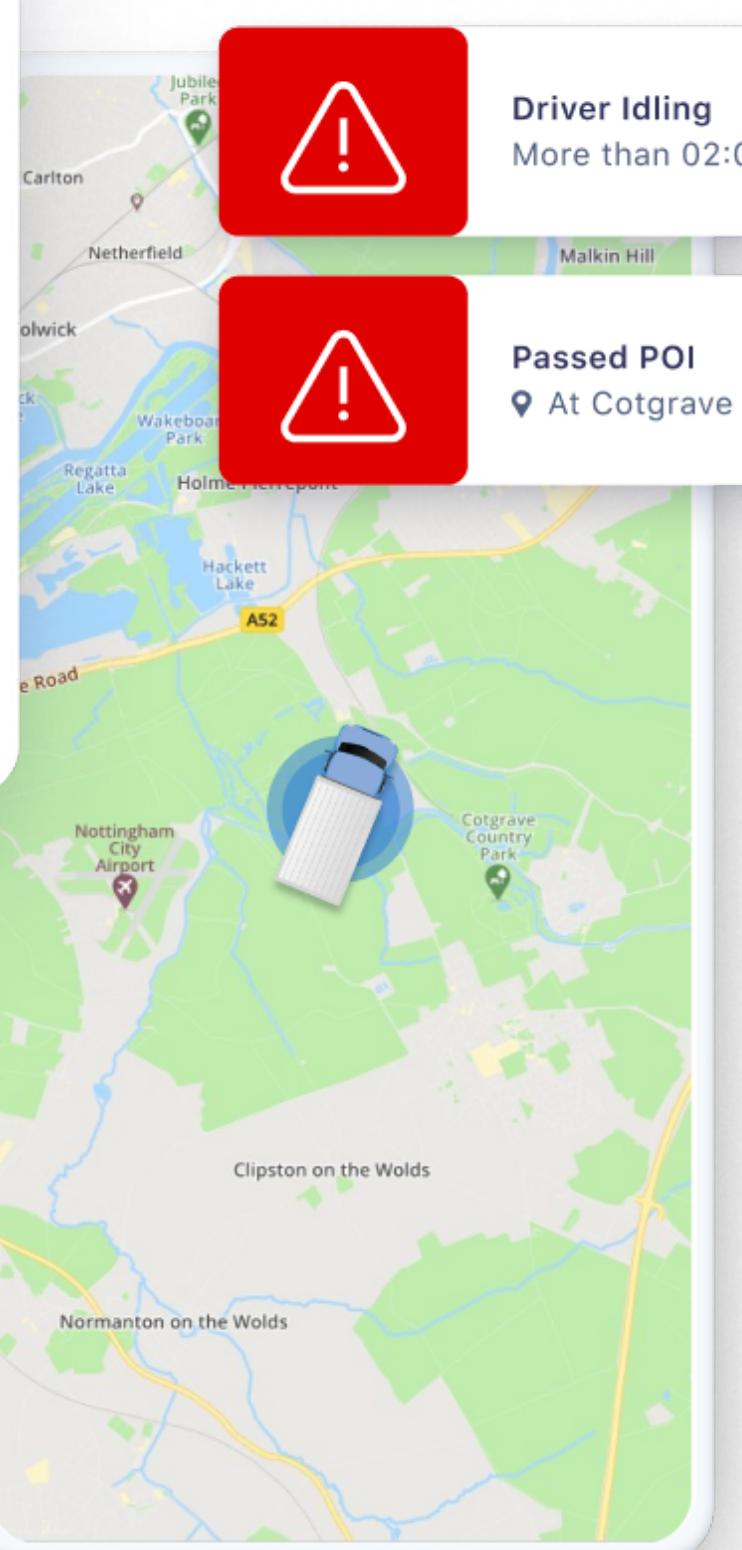

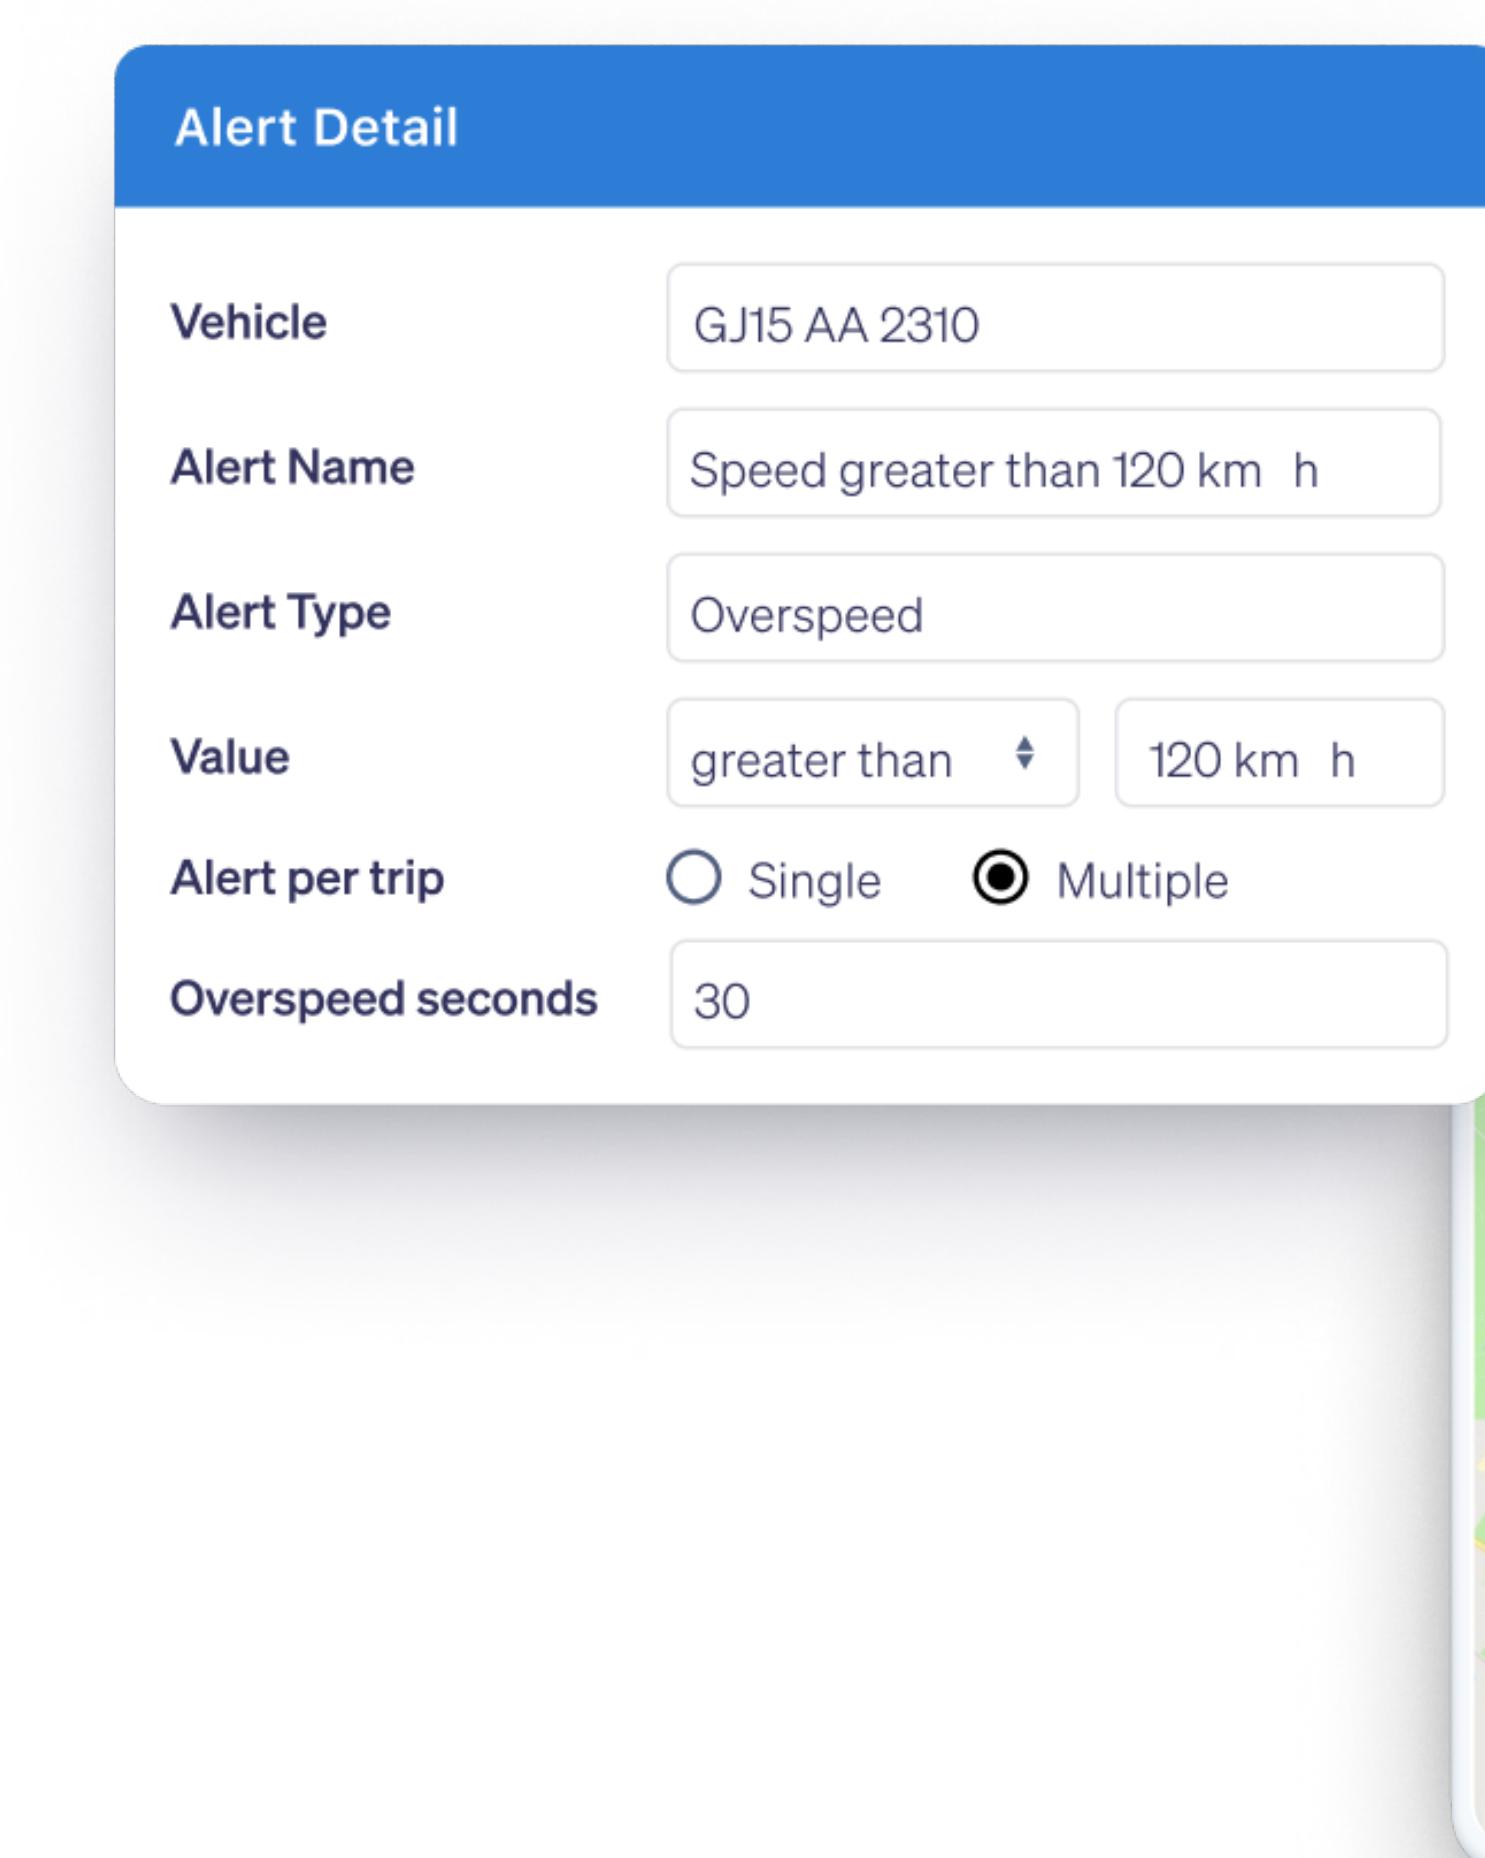

Custom alerts based on your business requirements

Prevent potential accidents or driving violations

Immediately resolve issues with SMS or emails alerts

Billing and Expenses

Track expenses with automated invoicing

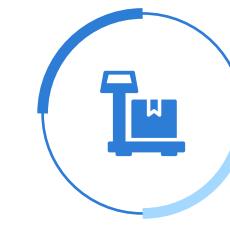

Managing expenses is one of the toughest parts of an operation. But LogyTrak makes it simple to manage all types of transportation-related costs, from toll payments to driver bonuses. Generate invoices quickly and make sure you receive faster payments. Easy and faster billing leads to reduced workload and optimised productivity.

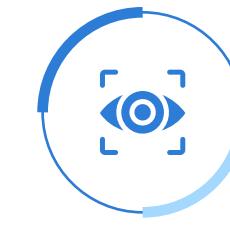

Multi-dimensional visibility from booking through billing

Compare vehicles with cost per distance, day, or hour

Easily manage payrolls for all the drivers

Detailed analysis of maintenance, breakdown and repair costs

Reminders

Reminders for Maintenance and compliances

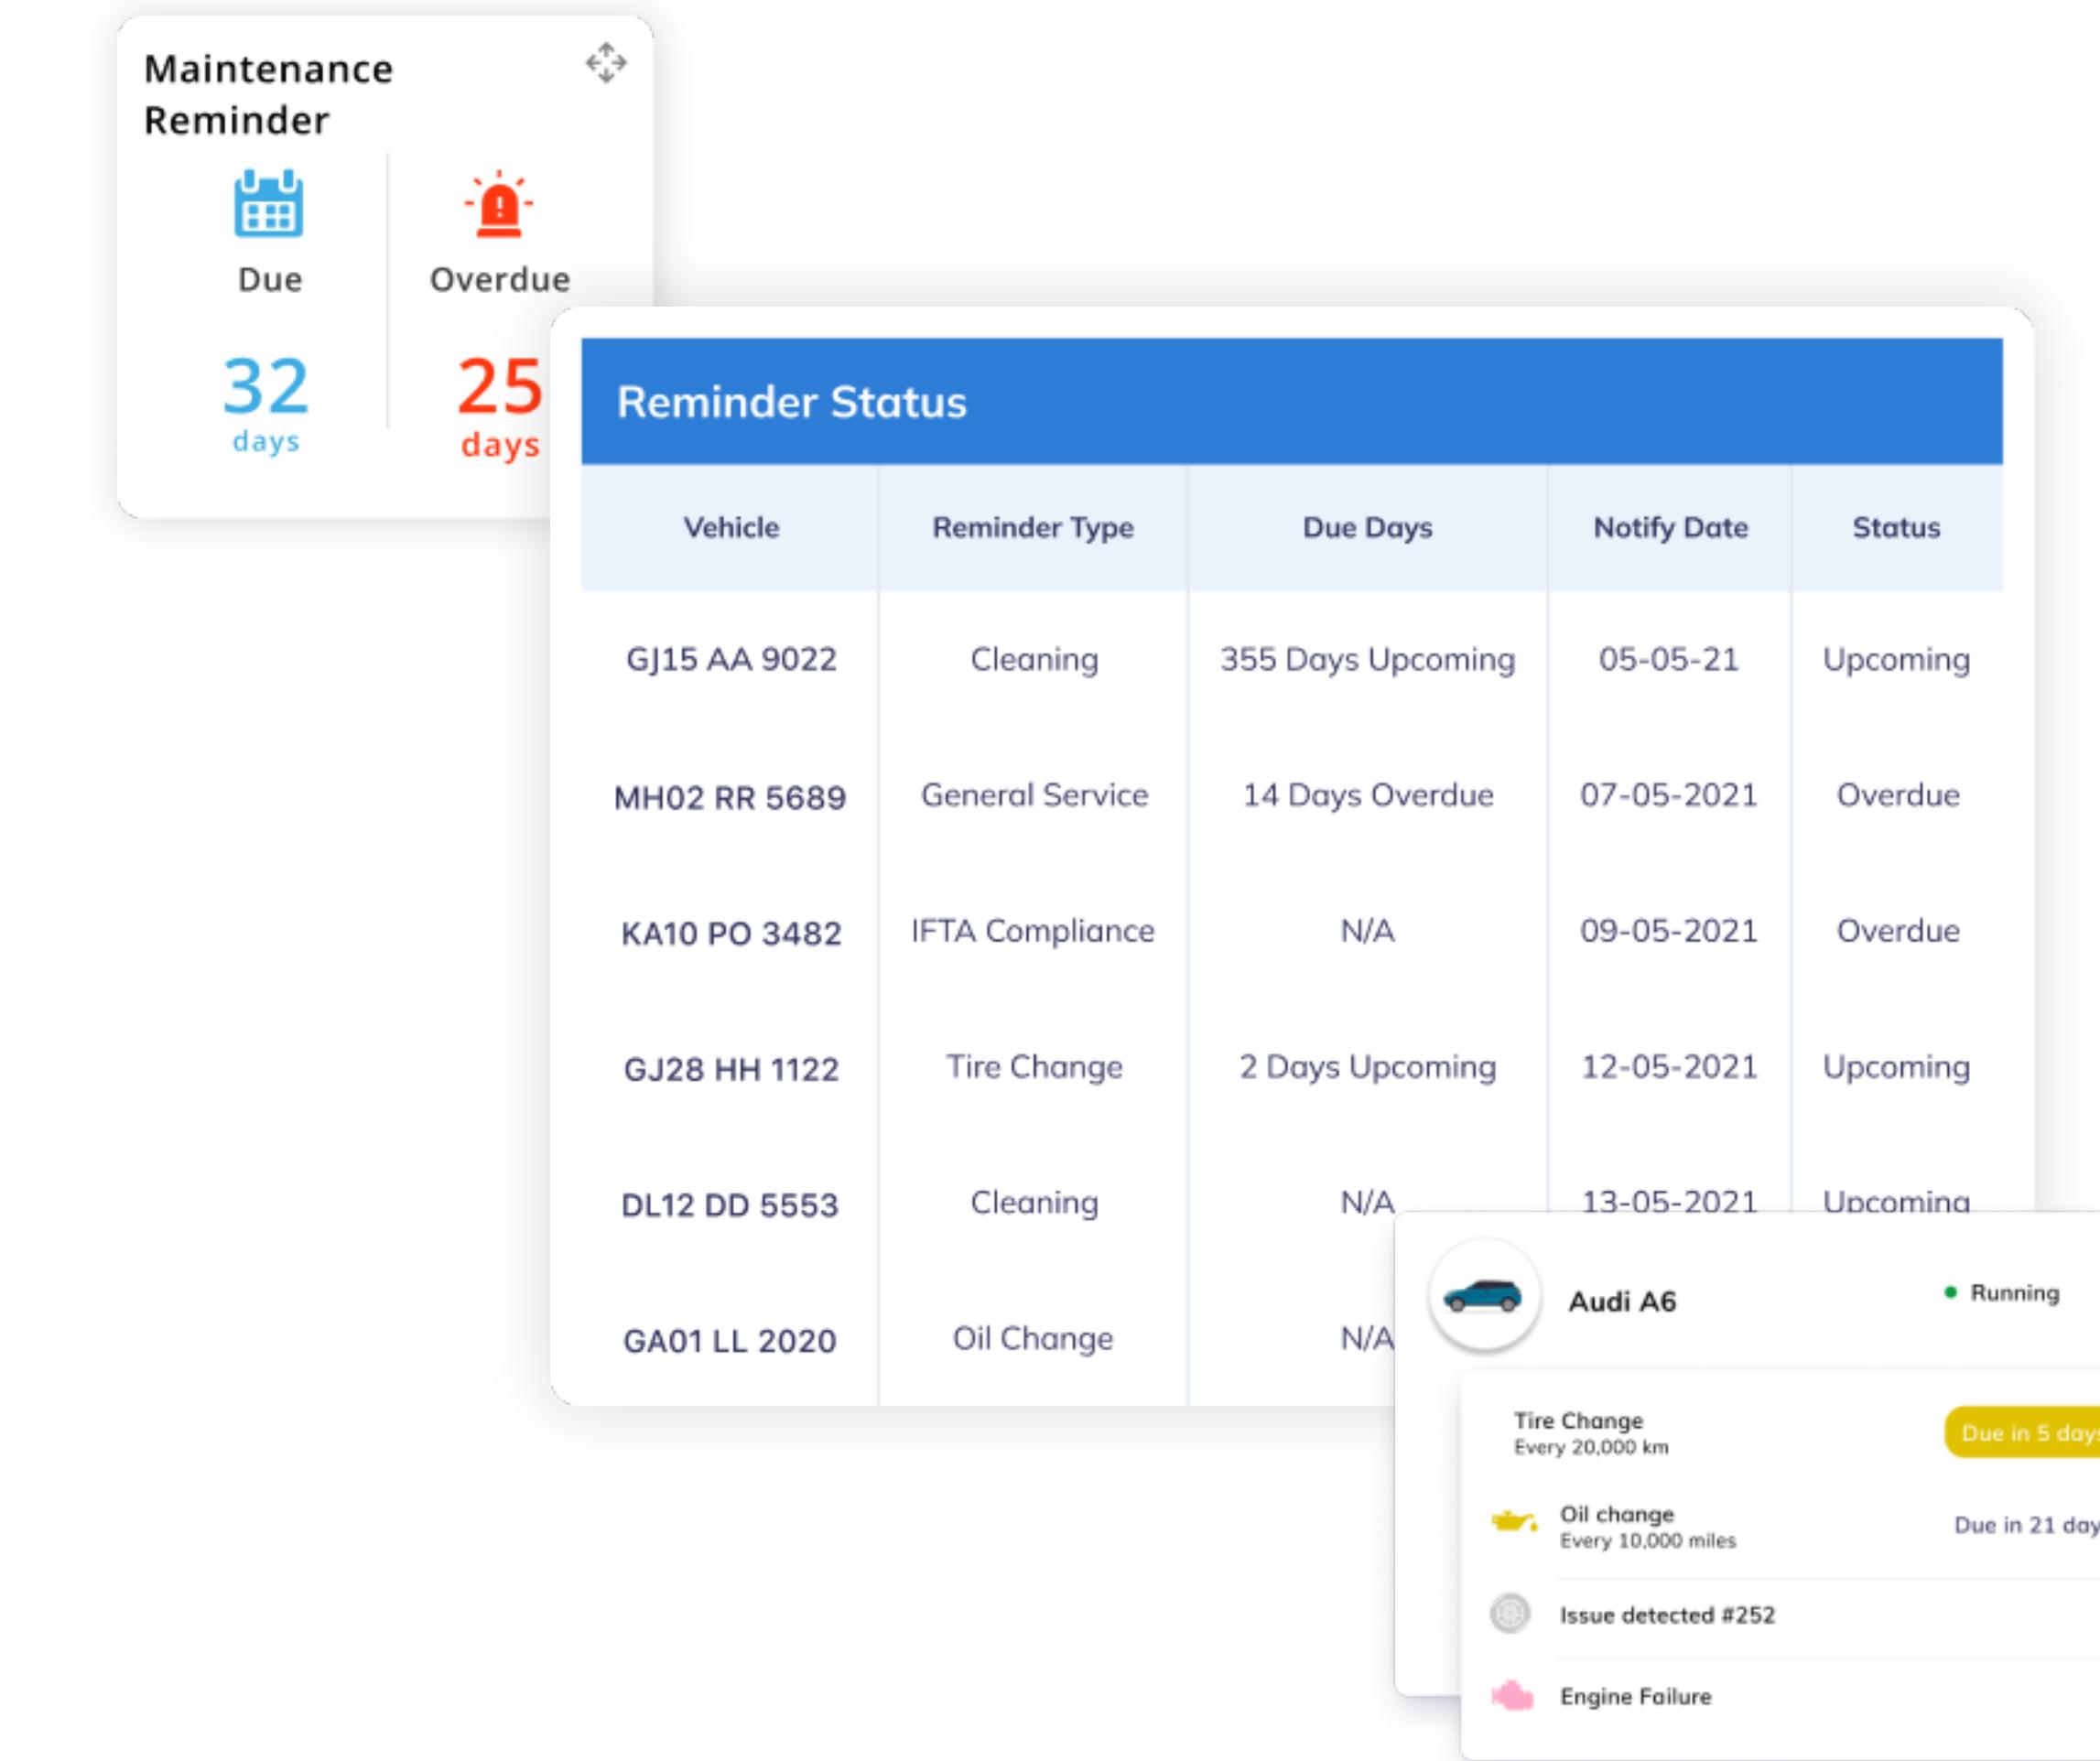

Timely maintenance plays a huge role in cutting logistics costs. From car wash to general servicing, get reminders for maintaining your vehicles. Not just that — from a PUC certificate to road tax, there are so many regulations that a transport business has to deal with. With timely reminders, you'll never forget to obtain a crucial certificate or permit.

Cut transportation costs by maintaining vehicles

Be compliant and never forget to obtain a permit

Timely deliveries with well-maintained vehicles

Increase productivity & profit with well-managed hardware

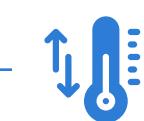

The screenshot displays the LogyTrak Reminders feature. At the top, a summary shows a Due reminder (32 days) and an Overdue reminder (25 days). Below this is a table titled 'Reminder Status' with columns for Vehicle, Reminder Type, Due Days, Notify Date, and Status. The table lists six vehicles with their respective reminder details. A detailed view for the Audi A6 is shown on the right, listing scheduled maintenance items: Tire Change (Every 20,000 km, Due in 5 days), Oil change (Every 10,000 miles, Due in 21 days), and Engine Failure (Issue detected #252). The Audi A6 is marked as 'Running'.

Vehicle	Reminder Type	Due Days	Notify Date	Status

Temperature Status

No more cold chain cargo spoilage

Temperature monitoring of cargo is a critical requirement for multiple industries. It is essential for transporting temperature-sensitive products such as food, chemicals, or pharmaceuticals. LogyTrak helps you maintain a consistent, optimal, and compliant temperature for safe deliveries.

Essential for transporting temperature-sensitive goods

Get notified for even the slightest change in temperature

Save money with no product or cargo spoilage

Detailed temperature summary with average temperature and charts

Job Tracking

Automate task assignment and tracking

Put an end to manually assigning and tracking jobs. LogTrak automates the entire process for you. Assign jobs and addresses, track deliveries and solve issues with ease. Efficiently monitor your driver's performance and keep a record of all the trips.

Track total distance & total load for every assignment

Boost productivity with a streamlined process

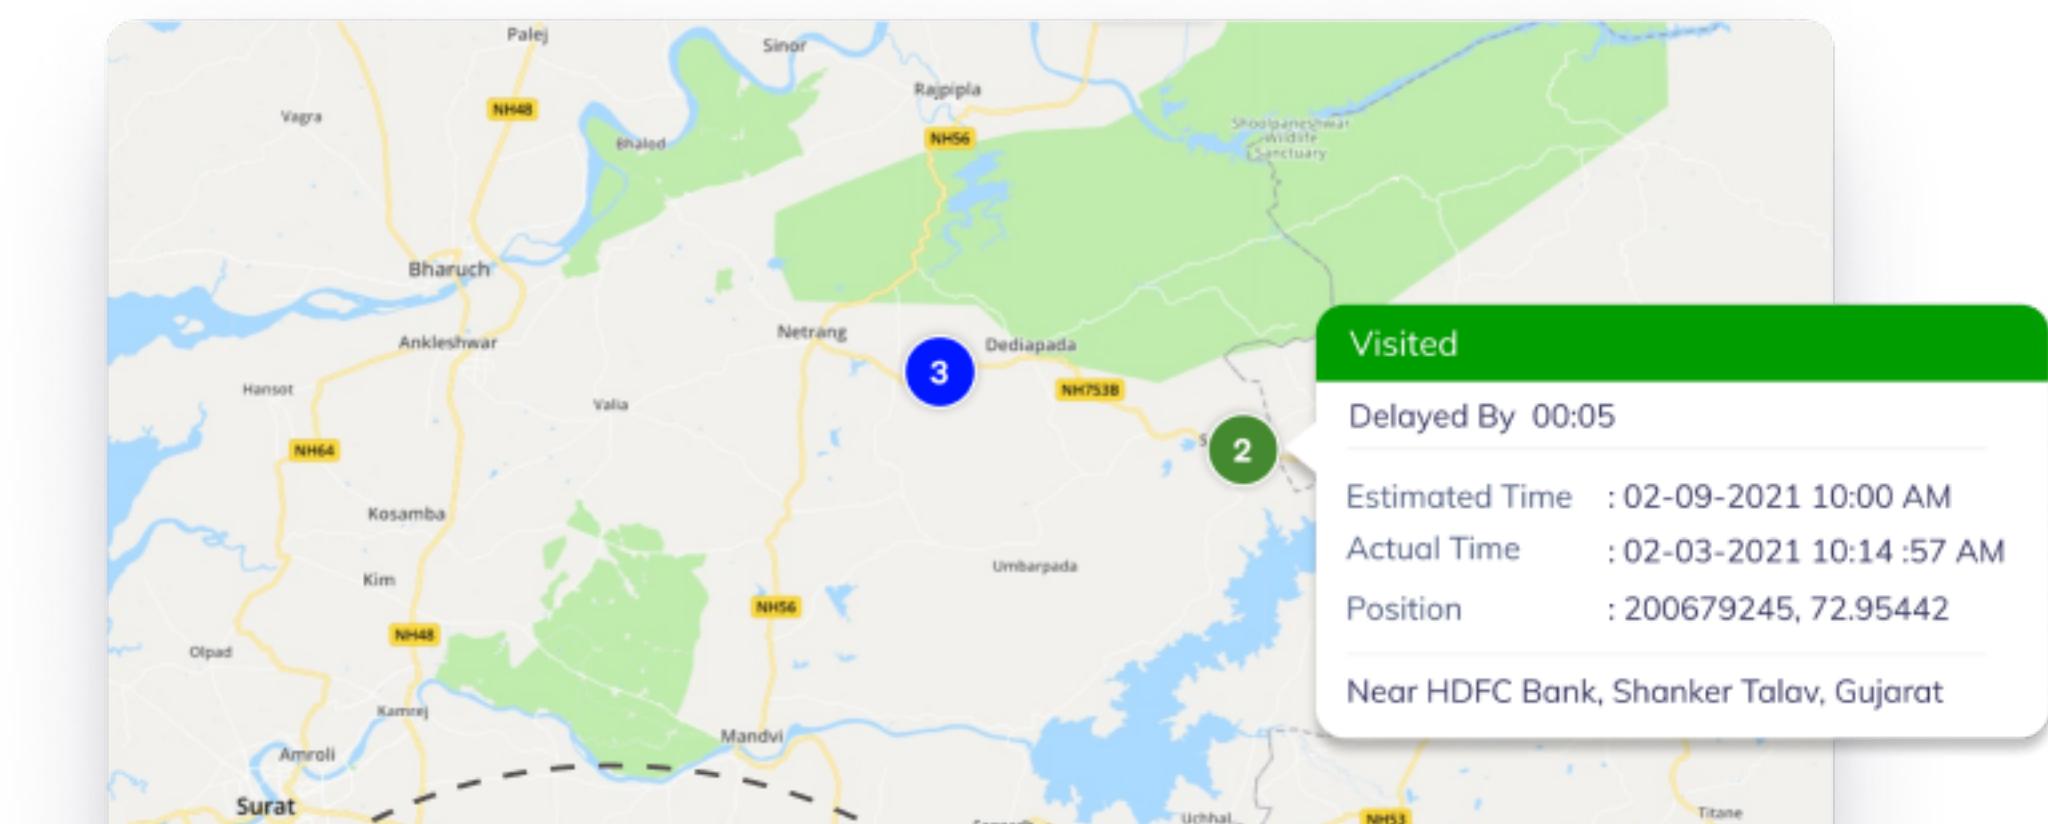

Stay up to date on finished & unfinished tasks

Check in on your employees when they fail to complete a task

Resolve any issues that arise with ease

E-lock Monitoring

Safeguard valuable cargo and consignments

An Elock is an important asset for monitoring and safeguarding your valuable cargo. With LogyTrak's advanced tampering detection, you don't have to worry about theft or lost goods. Get instant alerts for unauthorised passwords or break-in attempts.

Track total distance & total load for every assignment

Get Battery charge level status

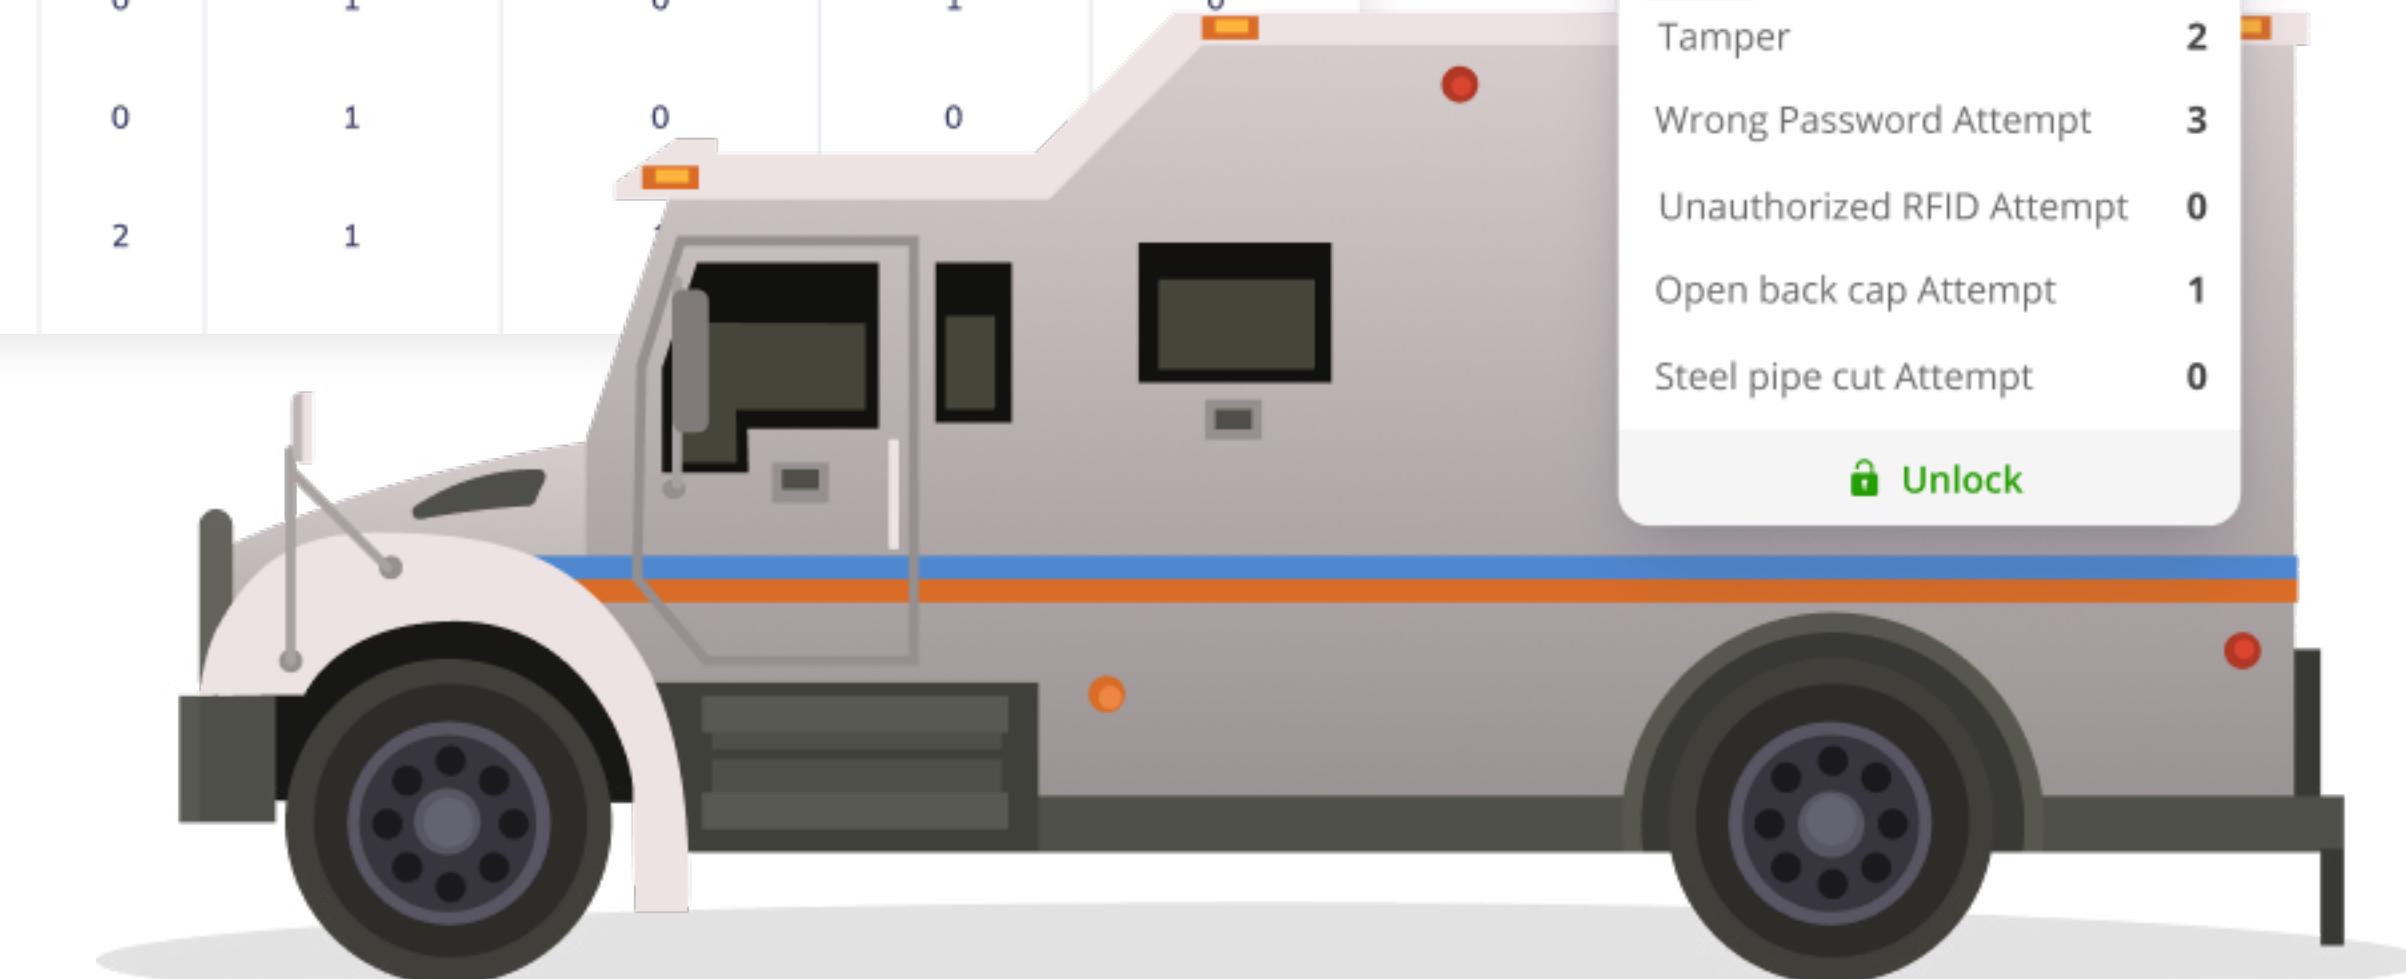

Detailed lock unlock summary with timings

Alerts for wrong passwords, pipecut attempts, and much more

Tire Management System

Faster deliveries with healthy tires

The health of your tires plays a huge role in productivity and fuel economy. Track how your tires are performing and get detailed reports about travelled distance, fuel consumption, and maintenance.

Track everything — from tire brand & model to size & position

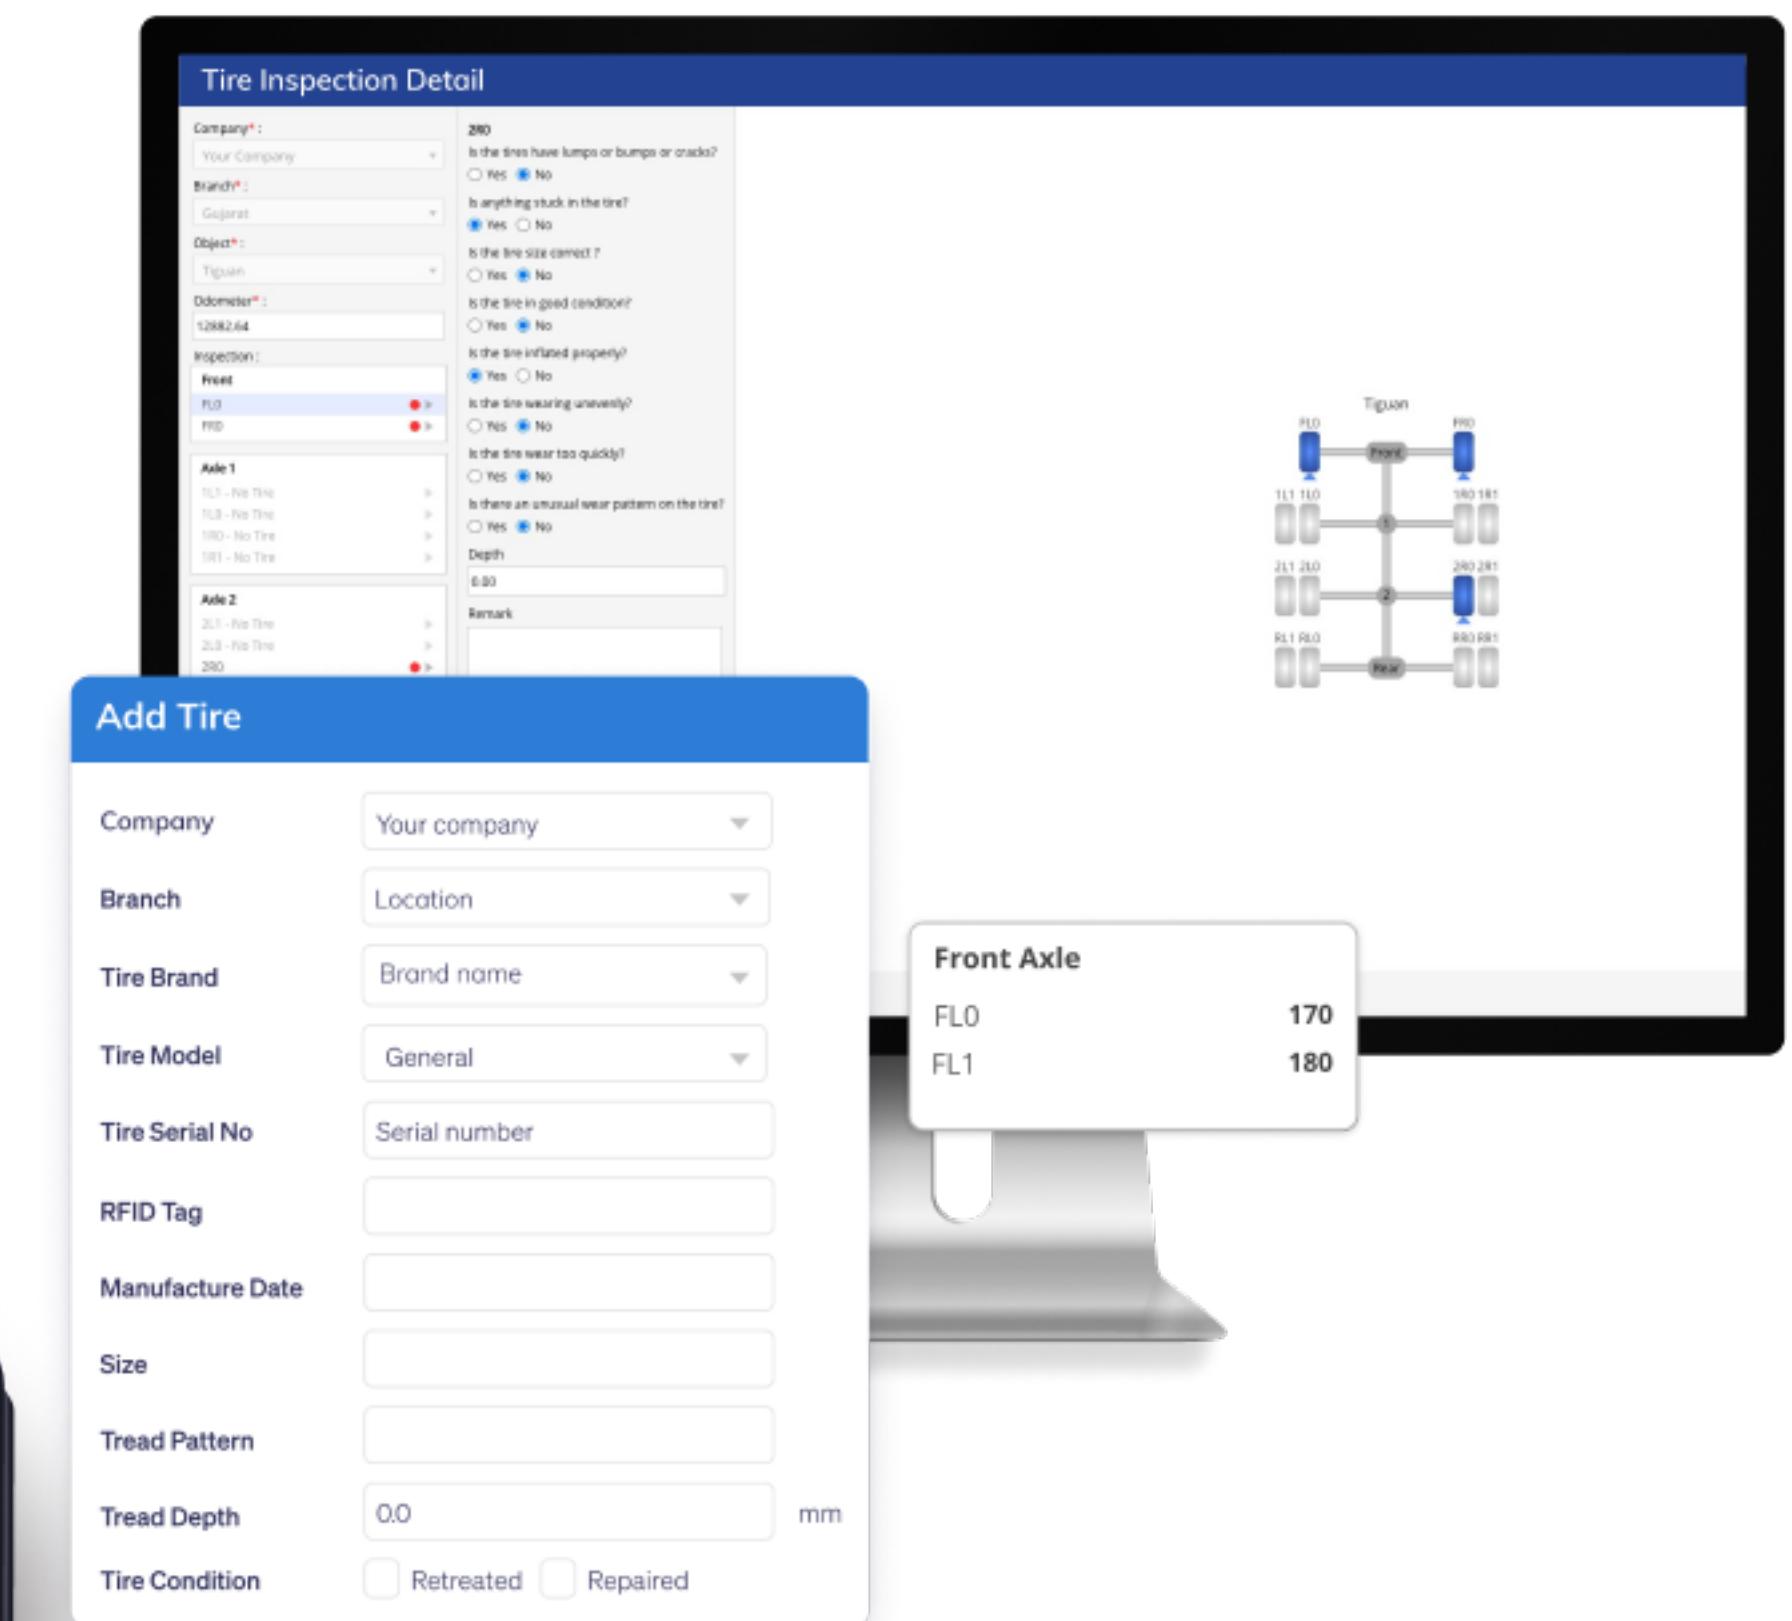

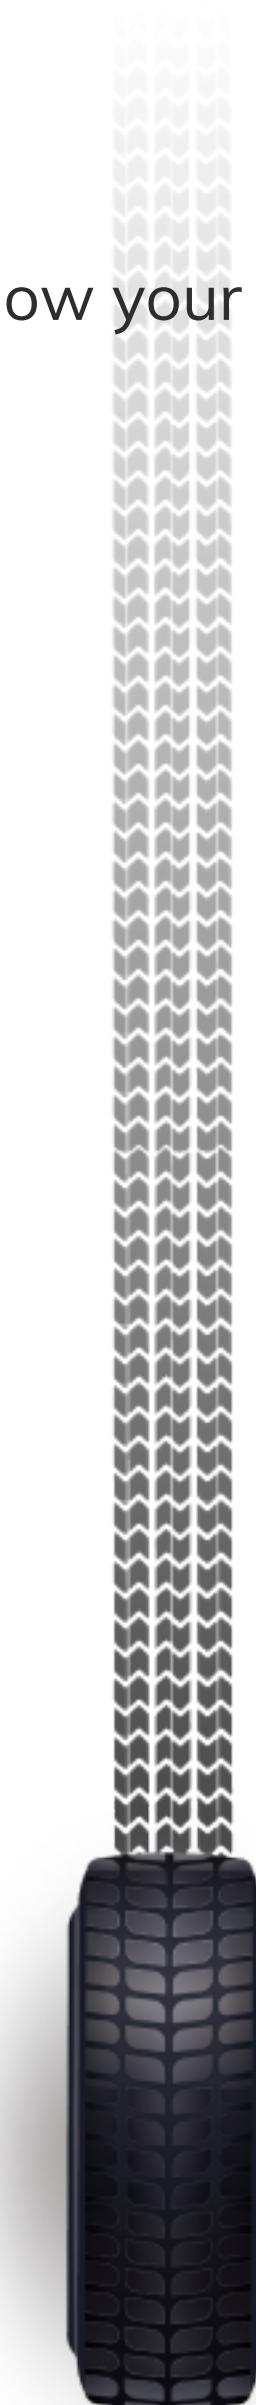

Faster shipment deliveries with healthy tires

Optimize fueling with tire mileage and projected mileage

Reminders for tire maintenance, rotation and re-treading

Manage your tire inventory easily

Driver behaviour

Detect irregular driving patterns and behaviours

Even after good maintenance, proper fueling strategy & healthy tires, it all comes down to who drives the vehicles. A driver's skills can greatly impact important transportation factors. Track driver performance & detect unhealthy behaviours that can jeopardise cargo safety or lead to fuel costs.

Detailed driver behaviour reports

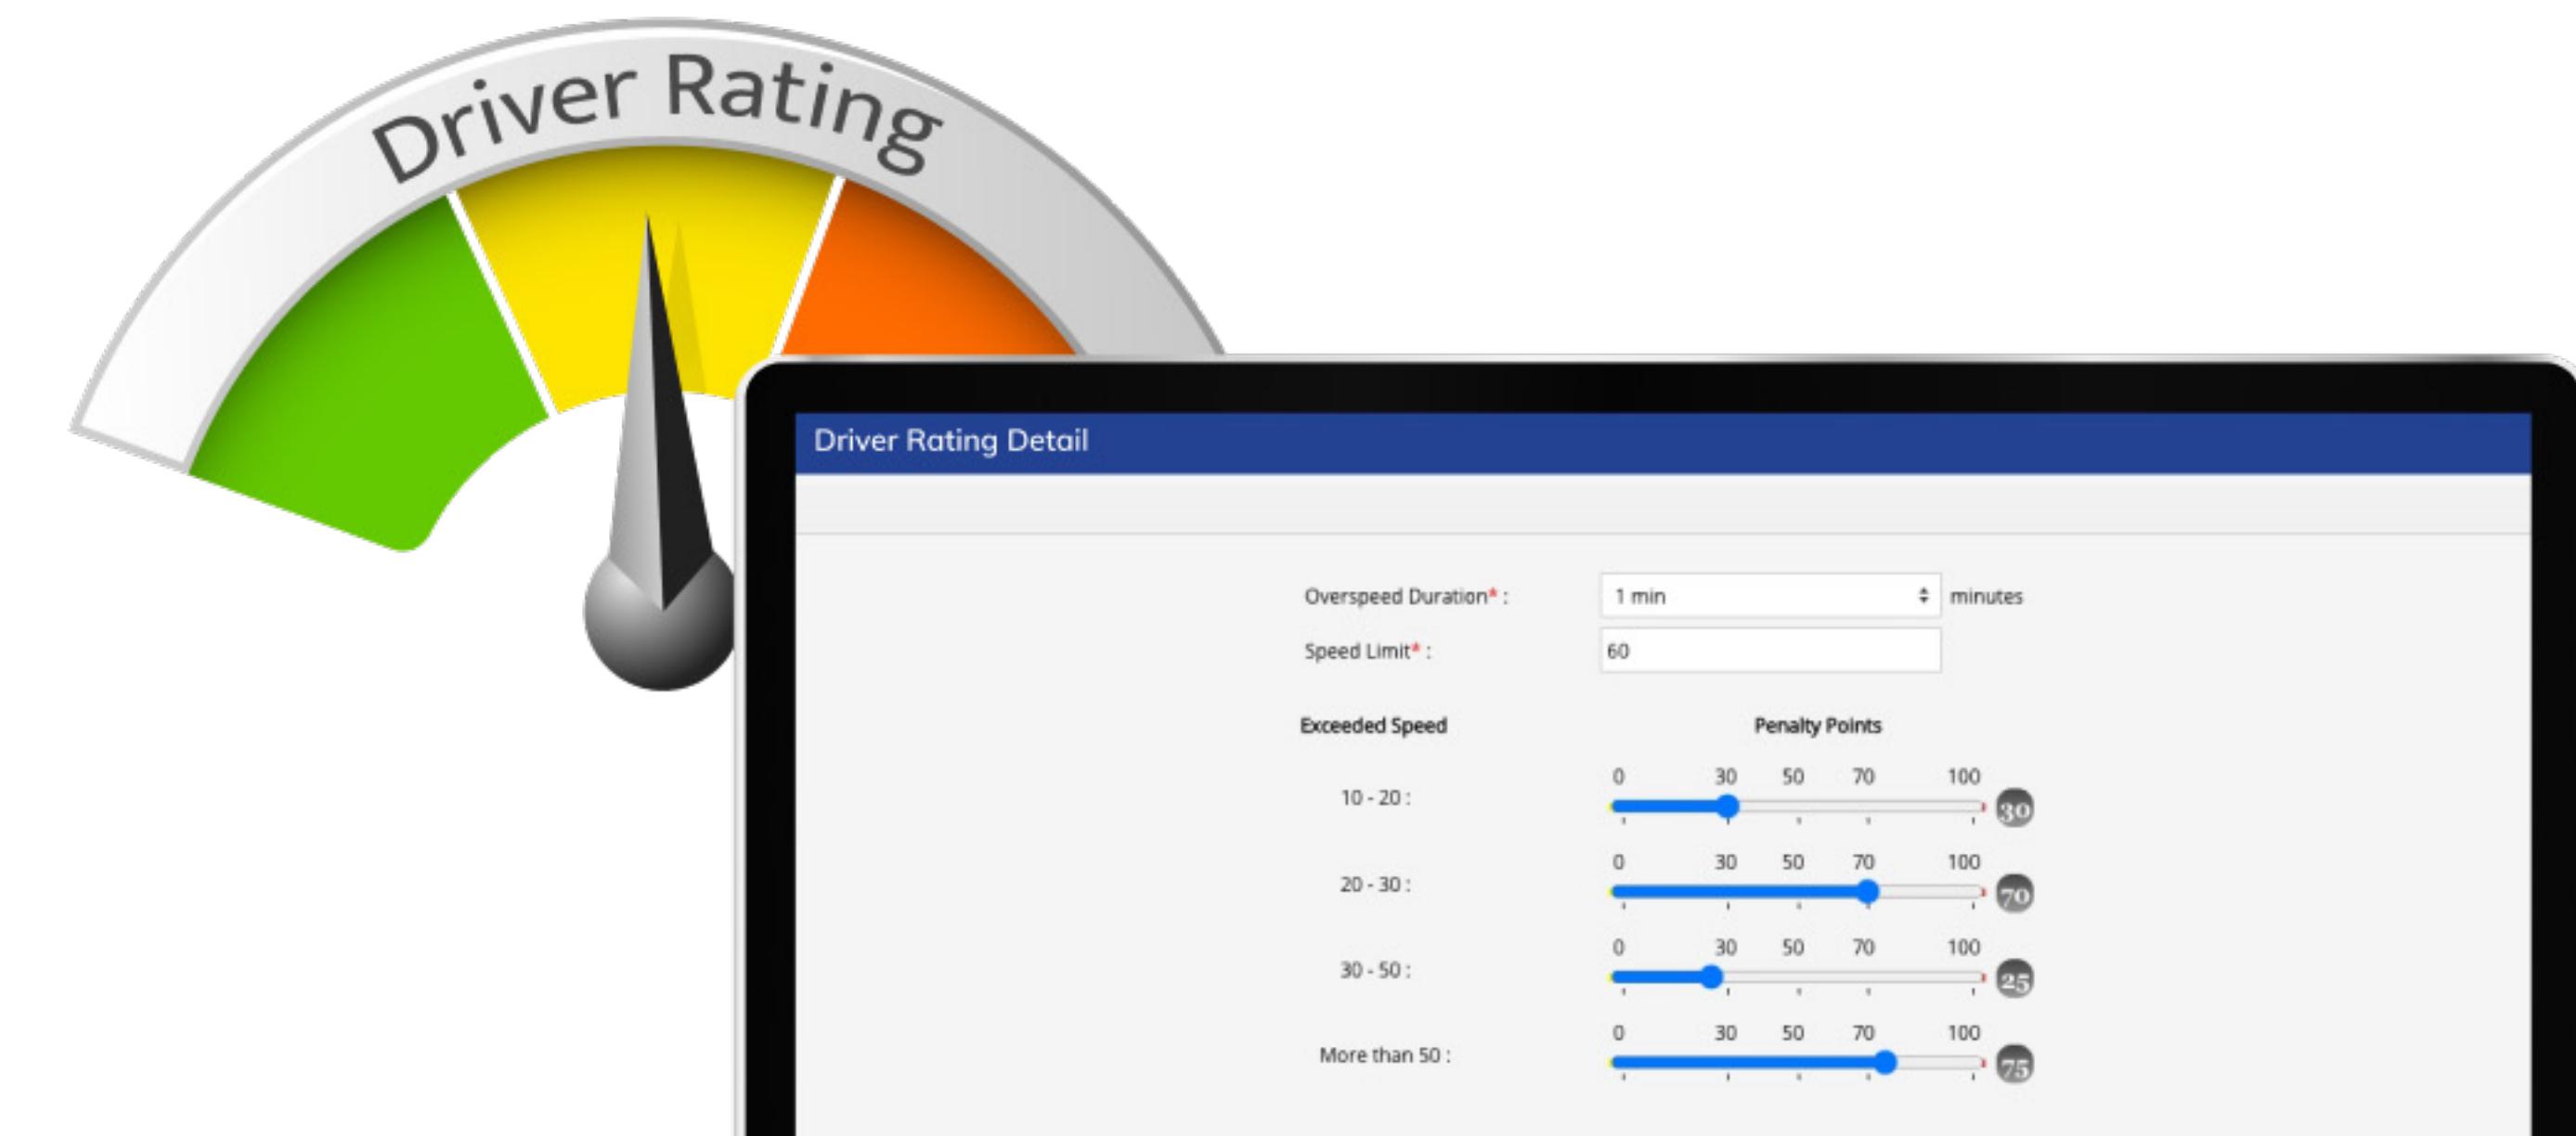

Prevent dangerous driving behaviours and idling

Cut costs on fuels and routing with optimised driving

Driver rating and RAG scores

💡 OBD - On board diagnostics

Make sure your vehicles are healthy

OBD involves a system placed in your vehicle that tracks and manages performance. It gathers and aggregates data for your vehicle and notifies the driver if there are any problems. It is essential for maintaining your vehicle's engine performance and analysing needs for repair.

Faster delivery of shipments with predictive maintenance insights

Real-time alerts for the drivers in case of irregularities

Reduce your carbon footprint and meet environmental compliances

Get health status, engine temperature, battery voltage and much more

DVIR Report

Automated everyday vehicle inspection

Driver Vehicle Inspection Reports — DVIRs are legally required records that describe the health of your vehicles. Our DVIR solutions make pre-and post-trip inspections simpler for both you & your drivers. Our paperless solutions are designed to quicken inspections and help you solve problems.

Get driver inspection reports immediately and stay compliant

Deal maintenance problems before they become a threat

Reduce the amount of paperwork that takes up your daily workload

Drivers get alert notifications for missing reports

IFTA report

Be compliant with IFTA reporting

Most American states and all the provinces of Canada are subject to the IFTA, which was created to make it easier to pay fuel taxes across international boundaries. LogyTrak lets you automate IFTA reports to streamline your efforts.

Eliminate human errors in report generation

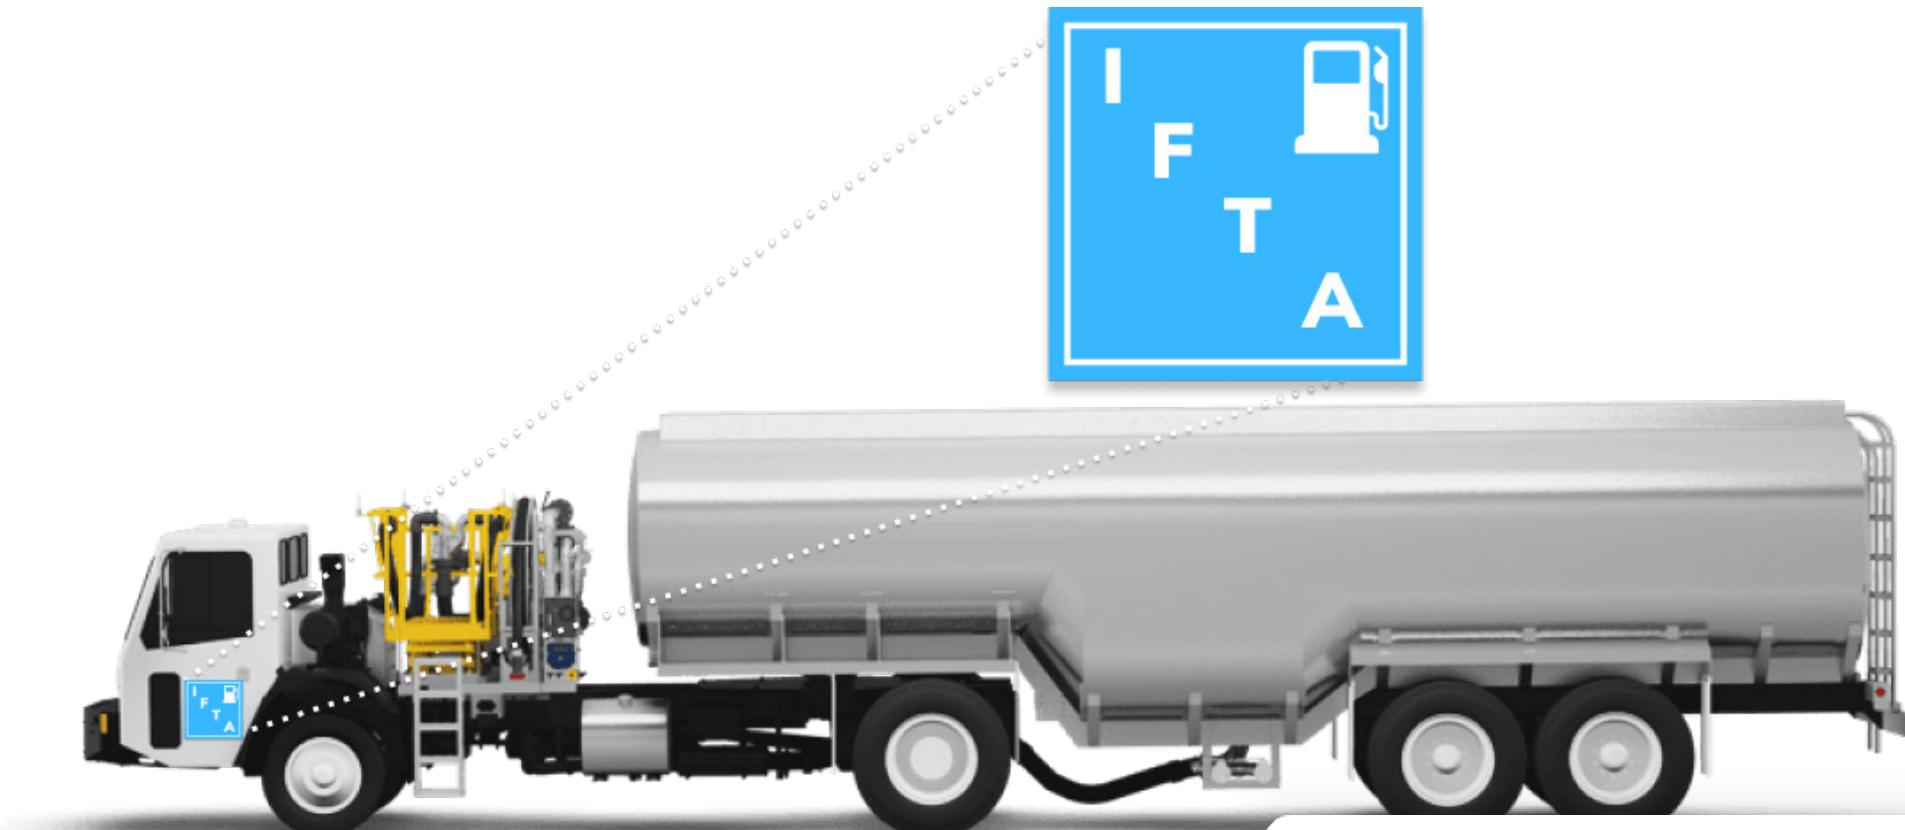

Better and simpler reporting on the fuel efficiency

Cut costs and be compliant with reliable IFTA reporting

Follow regulations and boost shipment efficiency
