

ENERGY MONITORING SYSTEM

Energy independent platform

Supported energy meters for various energy sources.

One platform for all industries

Customized EMS platform to satisfy any industrial need.

Easy integration

Seamlessly integrate with existing infrastructure and energy systems.

Tariff plan

Track energy costs with automated tariff-based analytics and reports.

White label brand

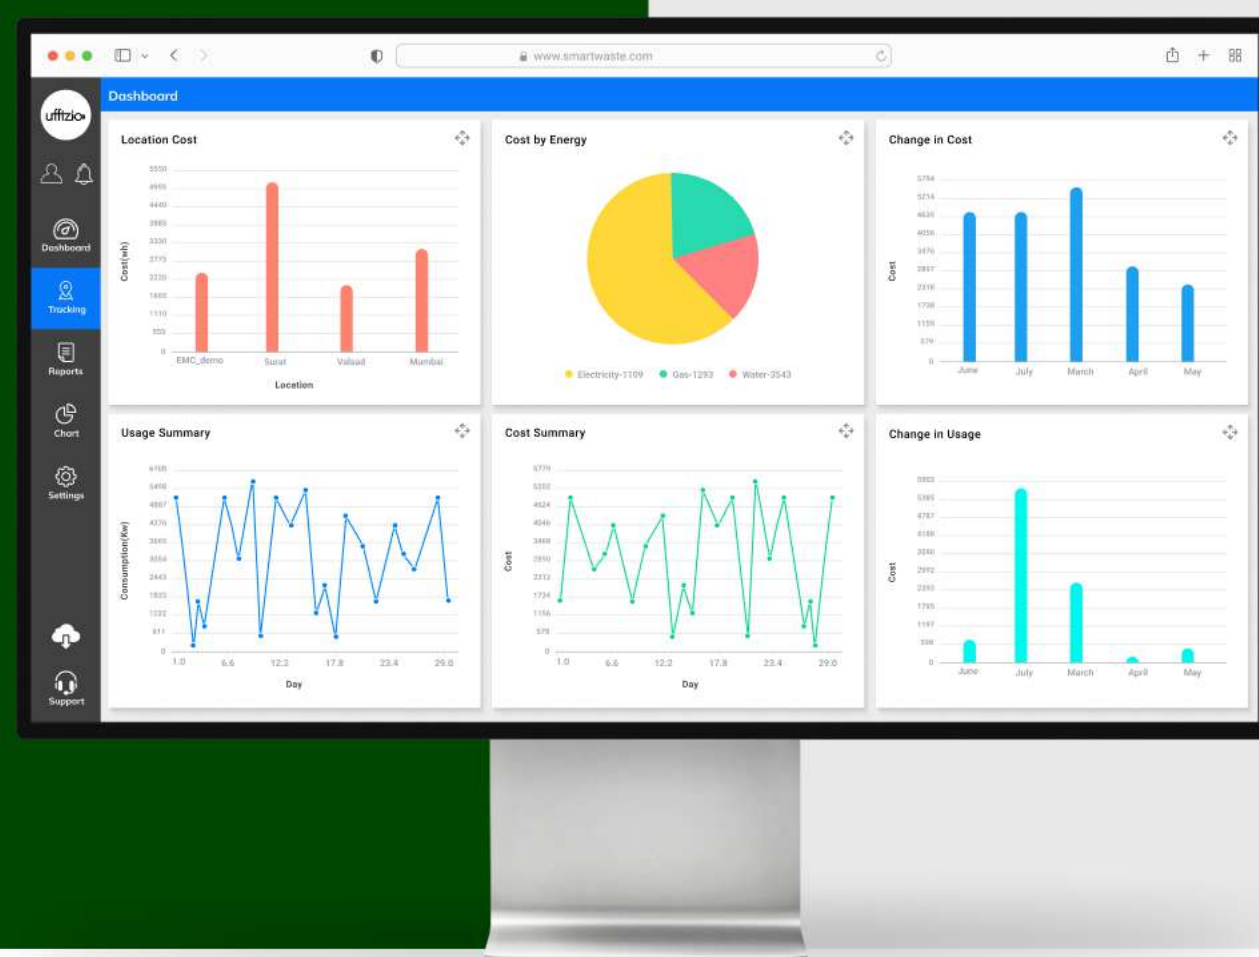

Customize the platform with your brand's identity.

“

Energy consumption management is complex without real-time insights. Our solution tracks and analyzes usage, identifies inefficiencies, and optimizes consumption to reduce costs and improve sustainability.

DASHBOARD & REALTIME-TRACKING

- Get all the insights on dashboard to monitor energy consumption efficiently.
- Track all the energy consumption in real time with live meter monitoring.

KEY FEATURES

Integration with custom apps

Easy modbus meter integration

Live meter monitoring

Reminders

Cost center billing

Multiple communication protocol
